O., where there is three churches two stores, school house, and cheese factory. For particulars apply to JOHN A. SNOOK, Owner, Trenton P. O. Ont., or HARVEY WARNER, Agent, Box 15, Napanee, Ont., Napanee, June 10th, 1897. 27d

TWO BIG STORES TO LET.
The Harshaw store, on North side of Dundas street, formerly occupied by the Bathing Co., as a Tour and Hotel, now occupied by E. S. Lapin. Immediate possession. Also the corner store in the Leonard Block, now occupied by John Paisley as a Grocery. Possession, Dec. 1st next. Apply to ALFRED KNIGHT, 26d At the office of the Cartwright Estate.

TENDERS FOR A NEW CHURCH IN VILLAGE OF CAMDEN EAST.
The undersigned will receive tenders for each department of the work necessary in the erection of a new church in the Village of Camden East, viz: Stone and brick work, carpentering, plastering and painting. All material found by the committee. Plans and specifications to be seen at my residence. The lowest or any tender not necessarily accepted.
CHAS. RILEY,
Sec. Treasurer of Building Committee.
Camden East, May 31st. 26d

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for supplying coal for the Dominion Buildings" will be received at this office until Thursday, 15th July.
Specifications can be seen and forms of tender obtained on and after Thursday, 24th of June inst., at this office, where all necessary information can be had on application.
Tender will not be considered unless made on the form supplied and signed with the actual signature of tenderers.
Each tender must be accompanied by an accepted bank cheque to five per cent of the amount of the tender made payable to the order of the Honourable the Minister of Public Works, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the work contracted for. If the tender is not accepted the cheque will be returned.
The Department will not be bound to accept the lowest or any tender.
By order,
E. F. E. ROY,
Secretary.

Department of Public Works,
Ottawa, 23rd June, 1897.
Newspapers inserting this advertisement without authority from the Department will not be paid for it.

SIGNS OF WORMS are variable appetite, itching at the nose, etc. Dr. Low's Worm Syrup is the worm expeller.

At Bisleys, on Monday last, it remained for Sergt. Colrigan, 59th batt., (Canada) the shooting in the "Hopplestone," to cap the climax, by putting on eight successive bull's eyes, his first shot being a sighting one.

Two Bottles Cure Pimples. GENTLE. For a long time I had pimples breaking out all over my face. I was told about B.B.B., and started its use. After taking one bottle I was much better, and the second bottle made a complete cure. I have recommended it to others of my friends, and they have found it uniformly satisfactory.

Whitebread, Ont.

The Clapp Shoe Co., Toronto, is in financial troubles. Arrangements are being made to organize and incorporate a new company with \$30,000 capital. S. M. Clapp, and Mrs. S. T. Clapp are among the incorporators.

Ladies silk bicycle belts, silver blouse sets from 20c upwards. The latest styles in souvenir Napanee yachting and Collegiate Institute stick pins at F. Chinnock's Jewellery Store, where you can also get all watch repairing guaranteed to give satisfaction.

AN INTERESTING CHAPTER OF THEIR SAYINGS AND DOINGS.

What Some Royal Women Are Engaged In—Marriage of Royalties—The Business Woman's Home-Coming—All Is Not Gold That Glitters.

"One of the things that has hurt me more than anything else in going away from home," says the girl who started out in the world to make her own way, "was when I went back after some time and found that I was no longer a necessity there. Every one was as glad to see me as possible and affectionate in every way, but I found that I had gradually drifted out of the family life—I was an outsider. They made their plans and lived their lives without me. They did not need me in any way. My outside life has been pleasant. I have done what I intended to do, and my relations with my family are pleasant in every way, but I shall never forget entirely, I think, that little hurt feeling, that feeling of loneliness, when I first found that I was an outsider."

A Jacobite Wedding.

British Jacobites celebrated the marriage of the Princess Maria Theresa of Bavaria and Prince Ferdinand Pius de Bourbon by a banquet on White Rose Day, June 10. The Princess is, after her elder sister, the direct representative of the Stuart line, and the Prince of Calabria is the son of the former King of Naples, whose portrait was drawn by M. Alphonse Daubigny as the King of Illyria in his "Iliad in Exile." The royal wedding took place on June 8, and, besides the banquet already mentioned, another was given in honor of the occasion on the day of the ceremony by the Order of St. Germain, founded by the Old Pretender.

Princess Maria Theresa.

Prince Ferdinand is a very young man, having been born at Rome on July 25, 1869. He bears the title of Duke of Calabria. Princess Maria Theresa of Bavaria, second daughter of Prince Louis, and granddaughter of the Regent Luitpold, was born in 1872. Prince Ferdinand of Bourbon is a nephew of the late King of the Two Sicilies, the famous "Bomba." His father is the Comte de Caserta, but he bears the title provisionally and without abandoning his claims to the kingdoms of the Two Sicilies and Jerusalem, one of which his elder brother enjoyed, while the other has long been only a pious aspiration.

Triumphs of Domestic Science

One thing that is almost as important as a knowledge of cooking, and fully as important when there are good servants to do the cooking, is a delicate taste. It takes a well-bred taste to know if the viands are cooked to the proper turn, the eggs absolutely fresh, the cream what it should be, and the salad dressing properly mixed. This is a less common possession than people think. A woman who has made a great success as a cook attributes it largely to her knowledge of how things should taste. The woman who takes up domestic science for a profession takes up a business which not only gives her plenty of scope for brain work, but is very hard on her physically. Where she does the practical work, the cooking, she is apt to break down, even while she is studying. If she is not strong. The effect of the heat and standing constantly on the feet is more than most women can stand.

Food and Beauty.

The woman who intends to have a good complexion must make a careful study of the food question. It goes without saying that sugary substances must be banished from the bill of fare. Candies are, of course, excluded. Cakes follow in their wake. As for pies and all other compounds of flour and grease, they are fatal to clear skins. Bread that is doughy or starchy ranks almost as low as pastry in the estimation of the seeker after good looks.

Alcoholic drinks are banished almost entirely; their effect, even in small quantities, being a mild form of congestion of blood in the face, which eventually coarsens the texture as well as ruins the color of the skin. For somewhat similar reasons all sorts of narcotics and stimulants are to be avoided. Whatever excites the nerves or overheats the blood excites the face, and the face is the first to show the effects of the

smooth, peachy texture which is the chief of every woman's ambition to attain.

Whatever has the effect of producing a healthy action of the digestive organs is good for the complexion. Acid and laxative fruits especially, if taken at breakfast, are good. Graham bread and toast rank high among the bread beautifiers. Red and juicy meats, green vegetables, milk and eggs, are all conducive to the attaining of a brilliant complexion.

The Princess Helene.

Helene, Princess of Naples, has been photographed by one of her new subjects in Italy, and the fresh picture shows her to be a very beautiful young woman. Almost everyone has read of her adventures as the Princess of Montenegro and her remarkable out-of-door life in the Black Mountains. Helene will not soon grow adapted to the cabined environment she will be compelled to live in as the wife of the Crown Prince of Italy. Her girlhood was spent in the mountains, out in the open air, in the saddle, climbing peaks for better views and even in hunting. She is an excellent horsewoman, a rare shot, and the exuberance of her spirits and brilliancy of eye are entirely due to the hygiene of her life up to date. The Princess does not speak Italian, but she is hard at work learning the language. Her family name is Petrovitch-Njegusch, and her great ancestor, Danilo, was made "Lord of the Black Mountains" in 1896. Hers is a family of fighters.

Wife of the Crown Prince of Italy.

There is a young Southern woman in New York, who, when she speaks of her early girlhood in the South, says: "The New York Times, smiles a little at what is evidently an amusing reminiscence. 'I will tell you what it is,' she said to a friend, who asked the cause of her smile. 'It was when I was very young that I had a very persistent lover, a man quite a little older than I. Well, finally, after much persistence on his part and persistent snubbing on mine, he asked me to marry him—by letter. It was a warm epistle, and at the close of

it he wrote: 'Send me at any time only one word—tell me only to come, and wherever you little I will fly to you.' That was some little time ago, and in the meantime my former lover has recovered from his misplaced affection, but he is still unmarried. In looking back, those old days seem so far off, and I smile to myself and wonder what would happen and how that poor man would feel if I should send him the 'come' he so much wished at this late day. What would he do, do you suppose?"

What Would He Do?

MAN!
Whoever heard of him! Where lies his glory dim—What's he To bow the knee To? Man!
Where Are his achievements great? Why doth he rule the State? How now! Why bow To man?
Man! What a poor thing! To him pity bring! Why doth he can't even be Without woman!
—Lin O. Type, in Woman's Edition Bangor Commercial.

Women as Letter Carriers.

A small number of women have served as letter carriers in England for many years, and they give general satisfaction. Only a few months ago a noted old postwoman died at Cutsyke, some ten miles from Leeds. From the Queen's accession in 1837 till 1869 she was the letter-

CASTORIA.
The face-bleaching signature of Dr. H. H. P. is on every wrapper.

The Princess of Wales has no great fondness for diamonds, and rarely wears them, except at state entertainments. She is fond of pearls, sapphires and opals, the unassuming qualities popularly associated with the latter not appealing to her in the smallest degree. For an affluence, too, she has somewhat of a certain, and the royal jewel cases contain some splendid specimens of that brilliant stone brought to England by the Prince when he returned from his memorable trip through India.

carrier in the ancient town of Pontefract and was never known to be absent from her duties from sickness during the 32 years. Monckton Milnes, first Lord Houghton, took an interest in her career, and was instrumental in obtaining a government pension for her in her declining years.

May Be Belgium's Queen

The engagement has been announced of Princess Clementine, the third daughter of King Leopold of Belgium, to Prince Albert, son of Count Philippe of Flanders. Prince Albert is the only son of Comte de Flandre, brother of the King. King Leopold lost his only son some years ago, and since the death of his elder brother, Prince Baldwin, in 1891, Prince Albert has been after his father's prescriptive to the Belgian throne. He is now in his 22nd year.

It was thought at one time that it was betrothed to the Princess Isabel, third sister of the Duc d'Orleans. Princess Clementine was born on July 30, 1872, and has two elder sisters. One, born in 1858, is married to Prince Philip of Saxe-Coburg; the other, who is eight years older than is the widowed Crown Princess Stephanie of Austria. Their mother, Queen Marie Henriette, is the daughter of the late Archduke Joseph of Austria.

Princess Clementine of Belgium.

Princess Clementine is well educated, draws and paints, speaks German, Italian and English, and is an accomplished musician and a patron of the arts. Princess Clementine, like all the children of Belgium's king, seemed at one time fated to unhappiness, for Prince Baudouin of Flanders, to whom she was to have been officially betrothed, died a few days before the declaration could be made. Should Prince Albert die before King Leopold the Belgian throne will escape her.

'The Cake of Scented Soap.'

"If you are about to inculcate, or endeavor to inculcate, ideas of cleanliness in the people among whom your missionary work is done," says Missionary Miss E. Marguerite Lindley, "be sure that you take with you scented soaps. A cake of scented soap will work miracles. It will institute a series of baths, when months of talk would be unavailing."

Crown Princess of Sweden and Norway.

Princess Victoria, the Crown Princess of Sweden, has taken up the wheel. Cycling has not been a favorite pastime among the royalties of Europe since the German Empress frowned upon it of late. It is said that William, too, does not care to see the women of the Imperial family astride the wheel. In the face of all this, however, the Swedish Crown Princess has taken up the exercise, it is said, at the advice of her physicians. The Princess is an invalid, and for many years has been unable to attend to the education of her children, which has devolved upon Queen Sophia. She spends most of her time in Southern Italy and the south of France, and the continued illness of his wife is said to have cast a gloom upon the spirit of the heir apparent to the throne of Sweden and Norway. Princess Victoria is 38 years old. She is the daughter of the Grand Duke of Baden, and was married to Gustaf in 1881. She has borne three children, all of them being sons.

Princess Victoria.

The Princess of Wales' Preference.
The Princess of Wales has no great fondness for diamonds, and rarely wears them, except at state entertainments. She is fond of pearls, sapphires and opals, the unassuming qualities popularly associated with the latter not appealing to her in the smallest degree. For an affluence, too, she has somewhat of a certain, and the royal jewel cases contain some splendid specimens of that brilliant stone brought to England by the Prince when he returned from his memorable trip through India.

CENTREVILLE

The recent rains have brightened up everything, and at present roots and grain have put on a new appearance. The weather previous to this was the warmest experienced for years.

Haying has commenced, some grain is also ripening fast.

The 6 was a very large gathering here on the 12th. Several from here took in the excursion to Watertown on that date.

A liberal meeting was held here on the 15th to select delegates to attend the convention to be held in August the 18th, at Sharbot Lake, to choose a Liberal standard bearer to contest the riding at the approaching provincial elections.

Huckleberries have made their appearance.

S. Reed is doing a lively business with his grain stacker.

KINGSFORD

A. W. H. Loya, wife, and daughter of Deseronto, spent Sunday at W. S. Provis.

Daniel McHenry and Frank Baite of the Kingston Business College, are home for their holidays.

David Warner of this place and sister, Mrs. Seasmith, of Emily Hill, have gone to Watertown.

Miss Minnie Robinson, of England, is visiting at L. S. Went's, Richmond.

W. S. Hewitt returned to his home in Hastings.

James O. Harvey is to be around after the 15th inst.

News of H. Went's at Sunday in Napanee. Went's attraction Napanee.

Miss Jennie Macdonough, of Belleville, is reviewing her acquaintances in this place.

H. H. McIndoe, wife, and son of Napanee, are spending the week-end at their parents, Mr. and Mrs. J. H. Dwyer.

A. J. S. Smith, of this place, spent the 12th inst. at the home of his parents, Mr. and Mrs. J. H. Dwyer.

TAMWORTH

Cape Colony has presented Great Britain with a first class battle ship.

The very finest Valencia oranges, bananas ripe tomatoes. Pine apples 5c to 15c each, lemons 10c per dozen, strawberries 12c per box, 15 bars soap 25c. All kinds of fresh vegetables, also the very finest groceries, cheap as the cheapest. Western beef from Guelph, spring lamb, pork, Fearnham's sugar cured ham, best English breakfast bacon, fresh fish, etc., at the Central Meat Market, J. W. Anderson, Manager; or at J. F. Smith's grocery.

A boy in Surrey, England, of the name of Thomas Ward, will be decorated by the Queen with a gold medal, because for the last ten years he has been neither late nor absent from school. This includes 4292 school sessions. He is the first and only boy in England who has ever made such a record. He has nine other medals granted him by the School Board for good conduct and perfect recitations.

J. S. Hulett is making an entirely new style of picture, known as the porcelain finish. This finish is the nearest approach to real life ever attained by photography and has to be seen to be appreciated. Mr. Hulett is in order to introduce this new style of work will have a representative call upon the ladies of Napanee and vicinity next week, with a full line of samples showing the scope of this new style of work.

The Deseronto Tribune says the Deseronto football club decided to withdraw from the district league, very properly refusing to be the victim of the conspiracy so evidently being played to compass their defeat. Poor little toothless scoundrels, Papa Pulkinhorn will not let his little darlings play any more with those nasty little Napehee children. No he won't, so don't cry any more.

The Women's Auxiliary of the Board of Domestic and Foreign Missions of the Diocese of Ontario are preparing a resolution of congratulation to the Queen on the occasion of her Diamond Jubilee, which will be forwarded to Her Majesty with similar addresses from the other dioceses of the Dominion. Mrs. Rogers, of Kingston, has the preparation of the resolution in hand, and to Miss Daisy Corbett, daughter of Governor Corbett, of Kingston, county jail, will be entrusted the task of writing it.

American cattle buyers who purchase stock in this district have adopted a plan that will reap them big profits, and at the same time supply Americans with some of the finest beef raised. They are purchasing all the stock, yearlings, etc., procurable, shipping them to the United States, where next fall they will be fattened and killed. Almost every day boat loads of such cattle leave Kingston for the United States. It is a drain upon the live stock resources of this country, but farmers are pleased to be able to thus get rid of their tods.

BINSON CO.

IN THE TWILIGHT.

My hands are growing weary.
While from my setting sun
The gold is slowly fading,
And so much work undone.

Now every passing moment
Some task unfinished brings
To hands grown weary doing
So many useless things.

My feet are also weary:
The ways they walk are hard,
The thorns have held and hurt them,
The stones have left them scarred.

Here, in the gathering twilight,
They falter now and fall,
Poor feet that stray so far from
The straight and narrow trail.

Away off in a canon
I hear a lone sheep cry,
And on the perfect pathway
See happy souls go by.

But O! My soul is weary
As wearily I plod,
And all because I've wandered
So far away from God.

—Cy Warman.

STRANGE BOOKS.

Some Specimens Anthologists Have Rescued From Oblivion.

The first anthology was a collection of Greek poems, epigrams and other small pieces of Archilochus, Sappho, Semonides, Meleager, Plato and others, between 680 and 45 B.C.

In 1471 a French baron offered a pledge of 10 marks of silver that a copy of Avicenna, which he desired to read, would be returned, and even with this security, equal in our money to over \$60, his request was refused.

The "Book of Common Prayer" was prepared by the command of Henry VIII. in 1546. It underwent several revisions, but the second, made in the reign of Edward VI., very nearly approaches the prayer-book as used to-day in the Church of England. The prayer for the royal family was introduced by James I.

Most of the chapters of Livy, as well as some of the entire compositions of Cicero and other ancient authors, have been recovered from the palimpsests, the original writing having been partially effaced in order that the monkish transcribers might use the parchment for their hostilities.

The vast collection of the state papers of Thurloe, Cromwell's State Secretary, which make about seventy volumes, were discovered by an accident. They had been hidden in the false ceiling of a room in Lincoln's Inn. By accident the fastenings having rusted away the ceiling fell and this precious collection came to light.

The largest work on one subject is the "Acta Sanctorum," or "Deeds of the Saints," most commonly called "Lives of the Saints." It was begun by the Bollandists, a community of the Society of Jesus. The first volume was completed in 1643 and sixty-one volumes have altogether been issued. Other volumes are still in preparation.

The first ecclesiastical anthology was the "Book of Sentences," by Pierre Lombard. It was a compilation of the leading arguments of the fathers upon points of divinity, arranged and digested under heads. It is said that 244 commentators have written annotations on this book, among others, Thomas Aquinas, Guillaume Durand and St. Bonaventure.

Fools and Fools.

A middle-aged woman who was riding upon a Payne-avenue grip car, yesterday morning, signaled the conductor to stop in front of the Arcade. Before the car had come to a standstill she scrambled over two seats, in order to get off on the inside. As her feet struck the ground she saw a Superior street car about five feet away and rushing on toward her.

She gave a shriek, stepped back, and was almost dragged under the car from which she had alighted. People who were watching her supposed that she would be killed, but by cool work upon the part of the gripman she escaped uninjured.

"Thunder!" exclaimed a big man upon one of the front seats of the Payne avenue grip car, "what fools some people are! They'll risk their lives just to save half a dozen steps or three seconds of time. If I could have my way I'd

never let a woman go down town without sending somebody who had sense along to keep her from making a blanked fool of herself."

He kept on mumbling about it until the car had reached Seneca street, where there are four tracks, with cars running very near together upon all of them nearly all the time.

Then, without looking around to see whether the way was clear or not, he swung off, stepped in front of a Woodland avenue train, and saved himself by making one of the greatest jumps of his life when the going of the motor was sounded about four feet from his ear.—Cleveland Leader.

Apple Tree With a History.

Mrs. Sarah Kincaid, living at Rushville, Ind., is the owner of the oldest fruit tree in the county; in fact, the eldest tree of any kind in the county planted by human hand of which there is record. The apple is a seedling, and is a seedling. It was planted in 1817 by some of the ancestors of Mrs. Kincaid. They were passing through this section from Kentucky and camped on this spot. The tree is now 80 years old. It is now almost 10 feet in circumference at the base and is over 50 feet high. It shades sufficient ground in summer-time for a colored campmeeting. The tree has never once failed to bear a crop of apples since it first bore fruit. In the days of slavery agitation several political meetings were held in this apple grove and under this patriarchal apple tree. It is said that meetings of Knights of the Golden Circle were also held there during the war. Thomas Bright, a farm laborer, committed suicide by hanging himself to the branches of this old tree. The family intends to let the tree stand as long as nature wills it should.

Deadliest of All Guns.

The British Government is now experimenting with a gun which will fire 1000 shots in 123 seconds. It is the deadliest of all the automatic man-slayers ever yet invented. As with all machine guns, the first shot must be fired by hand. After that the weapon will absorb cartridges and emit a chain of bullets as long as it is fed. Experiments made thus far show that on the occasion of a brief sharp attack, the gun can actually be made to fire eleven shots in a single second.

A very interesting feature of this new gun is that the explosive power results from the use of cordite. The whole of this substance is expended in pressure, whereas black powder is only useful for pressure to the extent of fifty per cent. The experiments with cordite and with the gun referred to show conclusively that cordite is not affected by water, as is gunpowder, and will stand great variation in temperature.

Rather Awkward.

A teacher examining his class in Bible knowledge asked:

"What did Samson slay the Philistines with?"

No answer.

Wishing to help them to remember it he tapped his jawbone with his finger, saying:

"What is this?"

Then they exclaimed with a mighty chorus:

"The jawbone of an ass."—Spare Moments.

A Scorching Remedy.

When you suspect what you are cooking has been scorched because you have neglected it for just one moment too long, lift the vessel holding the food quickly from the fire and stand it in a pan of water for a few minutes. In all but most every case the scorched taste will entirely disappear.

A New Stock.

There is a new stock. It consists of a straight band of the material, which hooks at the back and develops in front in a pert, fan-like bow. These stocks are made of silk gauze or dotted lawn.

CASTORIA

For Infants and Children.

The famous signature of J. C. Hart is on every wrapper.

where speeches suitable for the occasion were given by Revs. Rice, Ballantyne and several other gentlemen. After spending a pleasant time the society arrived home again at about 6 o'clock, the brass band playing a lively air. All seemed pleased with the days outing.

Mrs. David King one of our old and respected citizens died suddenly in Toronto where she had made her home for a few years past. Her remains were brought here for interment on Monday. A goodly number of her old acquaintances met at the station to pay respect to the remains of an old and respected neighbor. The family have the heartfelt sympathy of this locality in their great loss.

The rain that fell on Sunday evening was much needed as everything was failing for want of it. The weather has become much cooler and to day a nice moist atmosphere prevails, making all grain and root crops look bright again.

Bronchitis Cured.

MESSRS. T. MILBURN & Co., Toronto Ont.
DEAR SIRS.—I have used Hagyard's Yellow Oil for my children when they had bronchitis and always with great success. I used it also for sore throat, and can say there is nothing to equal it as a sure cure.

MRS. JAMES O'BRIEN,
Huntsville, Ont.

NAPANEE MILLS.

The welcome rain has cooled the atmosphere and made things a little more endurable.

Several men at the cement works were overcome with heat. Fortunately none of the cases proved fatal.

Mrs. Scott and daughter, Mrs. Cowie, of Watertown, N. Y., who have been visiting friends here for some time returned home on Tuesday last. Mr. Scott arrived on Saturday to accompany them home.

Mrs. Clancy goes to Kingston the latter part of the week to spend the summer with her daughter, Mrs. Asseltine.

Many took in the excursion to Watertown.

Rev. F. D. Woodcock preached to the Orangemen on Sunday evening last.

Alex. Morgan has moved into Mrs. Scouten's house.

John Boyes is seriously ill.

Roy Lott has gone to Warner, N. Y., to spend his vacation.

David Cameron, a quiet respectable young man, residing in the 4th con. of Camden, returning from Centreville, on the night of July 12th found Mr. Pingland lying beside the road dead drunk. Mr. Cameron roused him up took him up took him into his buggy brought him to Baker's corner where he should take the road for Mr. Lockridge's where he was employed. Cameron told him it was the place for him to get out, the fellow began feeling in his pocket and said he had lost some whiskey, accusing Mr. Cameron of taking it. Cameron told him that he knew nothing about it, Pingland became very abusive and used threatening language. Finally he struck at Cameron with a knife, cutting a dangerous wound near the lower part of the lung. Hopes are now entertained of his recovery. Pingland has been arrested and lodged in jail.

The water works pipe leading from the main to the tank on the market was found to be broken, on Thursday. Repairs have been made.

Eternal Vigilance is the price of perfect health. Watch carefully the first symptoms of impure blood. Cure boils, pimples, humors and scrofula by taking Hood's Sarsaparilla. Drive away the pains and aches of rheumatism, malaria and stomach troubles, steady your nerves and overcome that tired feeling by taking the same great medicine.

There has been considerable gossip of late to the effect that Sir Donald Smith, the Canadian high commissioner would resign on assuming his peerage, the two positions being incompatible. On this subject Sir Wilfrid Laurier said: "I know of no reason why a peer cannot be an agent-general, and I know of no wish or thought displeasing to the present agent-general."

The cause of the coal miners strike in the United States is to call into effect a scale of wages adopted at the annual convention held in 1895. Owing to the depression and demoralized state of the coal market at that time it was not enforced, but was left to the judgment of the National Executive Board. The average yearly earnings of a miner in Ohio last year amounted to \$221.75, from which must be reduced \$4 per month for blasting powder and pick sharpening which would make his yearly next earnings \$173.75.

Chesnut Croquet Sets at Polard's.

"Why do women have such poor hair nowadays?" asks an observing man. "When I was young, girls used to have hair they could sit on, and so thick they hardly knew what to do with it. Now few women seem to have hair to cover their heads. The partings are broad and coarse, the hair thin on the temples and behind the ears, so that it is unpleasant to look at the back of a woman's head and see the comb marks left in the scant locks. Spanish women and Creoles have splendid hair. Why can't Northern women have it?"

The briefest answer is that southern women perspire. Tropic warmth produces free passage of all the fluids of the body, throwing off all effete substance and procuring rich nourishment of every gland and fibre. Consequently we find in tropic women finely grained skins, continually dissolved, renewed and kept fresh by the delicate vapor which enwraps the body, and with this skin hair of marvelous length and thickness. Next to southern types the finest complexion and tints of hair are found in Irish, Scotch and German women, working in the fields, where moist atmosphere, coarse food and sunshine kindly do more for beauty than hard conditions can do against it.

Loss of hair is not rarely an injury to looks, but a serious damage to the general comfort of the body. The locks are a necessary protection to the skull and scalp, and assist in equalizing the temperature of the brain, blood and entire system. Thin hair prepares the way for neuralgia of the head and face, especially with open bonnets and a windy climate. Neuralgia quickly induces grayness and affects the sight. Nature's penalties for neglect are various and interlinked. Thin haired persons, often have weak eyes, but seldom connect the two conditions. The hair ought to be thick on the forehead and waved, or crisp enough to afford a slight shade of the eyes, without falling so low as to interfere with the sight. The flat, well-brushed bands of hair in the front, drawn tightly away from the parting, cause thinning on the temples and at the parting.

Wrong hairdressing aggravates spinal malady as truly as weighty skirts do. The Psyche knot, so pretty for the very few who know how to wear it, probably injured the hair of Grecian women, as it does our own. If twisted tight, Psyche knot, or "massive coil," does immense mischief by heating the base of the brain and sensitive top of the spine.

Young girls should wear their hair free and curling, tied by a ribbon or light fillet, or in braids as long as decorum will tolerate, as the nature of hair is to grow under all possible conditions, and as with good care its average growth is from five to thirteen inches a year, it would be the work of a few seasons only to provide most women with as handsome a chevelure as they desire.

Thin, soft, dry hair needs tender care, but with either the step toward improvement is thorough cleansing of the scalp and hair, which collects dust its entire length. Various alkalies, borax, ammonia, bicarbonate of potash and washing soda are used for washing the head, and strong hair will bear them, but they burn the life out of thin, dry locks. Most hair washes are entirely too strong. Soap bark is really better than anything, except the shampoo powder of the "fatal sisters," which leaves the hair luxuriously silky instead of flying like thistledown. Pour two quarts of boiling water on a tablespoonful of soap bark, let it cool till pleasant, comb the hair smoothly from the face, part it and scrub down with the shampoo brush, which is like an exaggerated tooth brush, wetting the skin well with the decoction. It lathers well, and the whole head should be gone over, making twenty or more partings, the hair rinsed in plenty of clean water, combed and wiped smoothly, not rubbing furiously and tangling, which breaks it.

Head Office. — Montreal

In discussing the recent action of the Senate, disallowing the Inter-colonial extension deal, the Globe concludes thus:

"It may be that it would be good policy for the government to appoint an independent commission, and make a thorough investigation into the whole question of railway subsidies in Canada, and the way that these subsidies have been used by their fortunate recipients during the last ten, fifteen or twenty years, and then let us resolve that once for all we have reached the end of the system of subsidizing local railways out of the Federal treasury."

In place of "it may be" we say it would be of great benefit to let the people know what has become of the millions of money granted as aid to all various railways — just how many people have been made rich — and how many have been made millionaires. Once the people of this country know what has become of the "aid" extended railway schemes and schemers, there would indeed be an end of subsidies. Let there be an investigation by all means. It would be interesting reading to learn for instance what actually became of the large sums of money given the C. P. R. and other heavily bonused railways.

Mr. TARTE is just now the bad man of the Reform party, according to the Tory press. All the vials of wrath and vituperation that used to be poured on Sir Richard Cartwright's head are now emptied upon the offending Tarte, and the reason for this is obvious. Mr. Tarte was a Tory. He is now a Reformer. He is clever, and as an organizer for a campaign cannot be equalled. Witness his achievements in Quebec. A large Conservative majority in both the Local and Federal Houses has been turned into a minority, and largely by Mr. Tarte's ability. Hence all kinds of charges are hurled at him. He is everything that is bad. But nothing

BOWEN E. AYLSWORTH

NOMINATED ON THE FIRST BALLOT.

A meeting of the reformers of Lennox took place in the town hall here on Thursday afternoon last, according to announcement. There was a good representation present.

Mr. Thos. Symington, president of the Lennox Reform Association, occupied the chair, and made a few appropriate introductory remarks on the situation, calling attention to the present favorable outlook for a victory in Lennox, and announcing that he did not intend to accept a nomination for himself but would work heartily for the choice of the convention.

Mr. D. W. Allison moved that the convention proceed to the choice of a candidate by ballot without nomination. The motion was seconded by Mr. H. S. Davy.

Ballot papers were then prepared by the secretary, Mr. Herrington, and passed around and collected.

A count of the ballots showed Mr. B. E. Aylsworth to have a clear majority of the votes, and on motion the nomination was made unanimous.

Mr. Aylsworth amid loud cheers from all present then ascended the platform and thanked the meeting for the nomination in a few well chosen words. He did not know whether to accept the nomination just then.

Mr. H. M. Deroche said he thought Mr. Aylsworth would be making a great mistake if he did not accept such a nomination. He was no doubt the strongest man the convention could bring out, and Lennox ought to be represented in the Local House. He had a clear majority over all others upon a free ballot, and this was a favor not usually accorded a candidate.

Mr. D. W. Allison thought if Mr. Aylsworth accepted the nomination he was sure of election.

Mr. Wilson, Selby, said Mr. Aylsworth should suppress his modesty a little, and take into consideration the fact of his having a clear majority upon a first ballot, which was then made unanimous. Better accept the nomination to day and let the meeting go forth with the news that Mr. Aylsworth is the reform candidate to represent Lennox in the next assembly.

Dr. Leonard who was second on the ballot was loudly called for, and responding, the doctor said he was well satisfied that Mr. Aylsworth should be the candidate, and he would take off his coat and work for him with pleasure.

Mr. Cyrus Allison thought as Mr. Aylsworth had obtained such a decisive majority on a first ballot he should yield to the wishes of the meeting and accept nomination.

Mr. White said he would vote and pray, and with Dr. Leonard with his coat off and himself voting as he prayed Mr. Aylsworth would be swept right into the Ontario Parliament.

Several other speakers including Mr. Rouse and Mr. Herrington urged Mr. Aylsworth to accept the nomination, and promised all the aid they could render.

Mr. G. W. Dawson then addressed the meeting, chiefly directing his remarks as to the best method of organizing. Incidentally, however, Mr. Dawson alluded to Mr. Hardy, who was, he said, a veteran politician of twenty-five years experience in public life, and who had never been caught tripping.

In concluding an able address Mr. Dawson said:—Mr. Whitney says we are on the eve of direct taxation and nothing can avoid it. Therefore do not support Mr. Whitney, because Mr. Hardy sees

cheer, always ready, always efficient, always satisfactory; prevent a cold or fever, cure all liver ills, sick headache, jaundice, constipation, etc. 25c. The only Pills to take with Hood's Sarsaparilla.

HER ORGAN.

By VIRGINIA N. LEEDS.

It was all on account of Miss Malvina's organ. If she hadn't had an organ it would probably never have happened. The dictionary declares that an organ such as Miss Malvina possessed is "a membranous receptacle, the principal organ of digestion, in which food is prepared for nourishing the body."

Perhaps Miss Malvina's organ was a membranous receptacle. There were no absolute proofs to the contrary—but that it was an organ of digestion was simply a slander. There was no digestion about it. It was indigestion all the way through. The food that went into it, if it made up its mind to remain, didn't nourish her body in the least and only subjected her to every kind of discomfort.

Taken as a whole, this organ, which for lack of corroboration we shall call a membranous receptacle, was a barrel organ of indigestion in which nothing except torture was prepared for either body or soul.

It had lost to Miss Malvina friends, fortune and husband. The former had dropped off, one by one, on account of their pet specific being rejected; by either Miss Malvina or her organ; the second was a fine musical talent, which she might have turned to account but for the same melancholy cause, and the third was perhaps the most dismal of all.

Col. Wilds, a gallant officer, had in the earlier days lost his heart to Miss Malvina, and would no doubt have married her, but during a sojourn in India he had fallen victim to a liver complaint, which so disgusted him with disorders of the human machinery, that any young woman possessed of so unpardonable a thing as an "organ," hadn't the remotest chance with the gallant officer.

Miss Malvina, therefore, was simply not in it at all. And so at the time our story opens we find Miss Malvina wretched, friendless, sickly and dependent upon a disagreeable old aunt.

To be sickly is bad enough without being friendless, but to be both and to have an "organ" into the bargain is hard luck indeed.

Mrs. Smithers, Miss Malvina's aunt, was a detestable person. She believed thoroughly in the text that a fool and his money are soon parted, and she obeyed the text to the letter. She had plenty of money and no heirs, but, like all misers, she did not consider that she had near enough, and she hoarded it up for Heaven knows what purpose.

She was in no wise a charitably disposed individual, though the fact of her giving a home to her orphaned niece might imply that she was. But no one would think so if he knew in what manner the home was held out.

"Dear Malvina," she wrote. "As you cannot starve, I suppose I must take you in."

And poor Malvina, whose organ had rendered her a meek and miserable mortal, responded weakly:

"Dear Aunt: As you say, I cannot starve and so I must accept your generous offer."

And when Miss Malvina arrived, in company with a goody-sized apothecary shop, Mrs. Smithers' acerbity was by no means appeased.

"Bother your organ!" she exclaimed. "It bothers me," returned poor Malvina.

This exclamation and pitiful rejoinder became an almost daily phrase.

Mrs. Smithers had not the slightest patience with her niece's membranous receptacle, and at every meal such mortal enemies as hot broad pies confronted poor Malvina. The organ, naturally, cried out against such indignities, and Miss Malvina grew hourly worse.

Such torments as the poor thing knew no words can describe.

Finally, to Mrs. Smithers' utter horror, the family physician had to be summoned.

Nor was this the worst. After pro-

FONTHILL NURSERYMEN,

The Leading Canadian Tree Men

The Napanee Express

NAPANEE, FRIDAY, JULY 16th, 1897.

It has been announced over and over
again that Sir Richard Cartwright
was to be the next High Commissioner
and take up his abode in London.
There was some truth in the rumour,
too, but many Grits and Tories are
anxious that Sir Richard should stay
in Canada. They say with much
truth that Canada cannot afford to
lose Sir Richard's services. These
representations are likely to have the
desired effect, and cause Sir Richard
to remain in this country.

SIR RICHARD CARTWRIGHT was in
town at the latter end of last week,
and we are pleased to say was in
vigorous health. This leads one
incidentally to remark that Sir
Richard is now a great man with the
Conservatives. They have suddenly
discovered that he is the embodiment
of all the virtues, especially virtues
political. Journals that have been in
the habit of disparaging everything
that the worthy knight did, and of
abusing him in season and out of
season, have now discovered their
mistake, and lavish praise where
before was bestowed.

has been proven, and we are sorry the
Senate did not go on with its enquiry
regarding the Drummond Counties
Railway before adjourning. Mean-
time, Reformers should be careful not
to be prejudiced against one of their
ablest public servants. What has hap-
pened with regard to Sir Richard
Cartwright may soon occur as to the
Hon. J. I. Tarte, the minister of public
works, and instead of being called
everything that is bad, he may be
lauded as the embodiment of every-
thing that is good. The Tory press is
so very uncertain just now.

LOOKING BACKWARD.

The Toronto World of Saturday last
says:—

"One can often get a clearer view of
things by using his imagination a little.
And we ask our readers to try and grasp
the situation as concerns Britain and her
colonies in this Jubilee year by imagining
Sir John Macdonald in England to-day
instead of Sir Wilfrid Laurier. Were the
old chief alive, next to the Queen's, it would
be his jubilee. He foresaw and worked
up to what has actually arrived. His
would have been the master mind to sug-
gest a broader national policy—an Imperial
policy—for the situation. Sir John would
have declared with no uncertain sound
that it would be in the line of Imperial
policy for the Mother Country and her
colonies by treaty, by joint tariff legisla-
tion, by preferential arrangements, to have
formulated a policy that would have built
up trade between the various members of
the British family, that would have resist-
ed the encroachments of rival nations,
that would have aided in securing peace
and maintaining the dignity of our race.
Sir John Macdonald did believe that
nations and parliaments could promote
their own welfare; Sir Wilfrid Laurier
says his idea is the Cobden idea, that the
least interference or even direction of trade
is best. Instead of the Canadian Premier
being an actual damper on the formation
of a new and progressive Imperial policy,
Sir John Macdonald would have supplied
one that would have commanded the ap-
proval of the whole empire."

We think the writer has been sleep-
ing and had a dream. After a chance
of eighteen years duration, the late
lamented Sir John did not accomplish
very much in the way of better trade
relations.

Family Friend—I congratulate you, my
dear friend, on the marriage of your
daughter. I see you are gradually getting
all the girls off your hands.

Old Olivebranch—Off my hands—yes;
but the worst of it is I have to keep
all their husbands on their feet.—Lon-
don Tit-Bits.

They Went After It—"Great Scott,
Ratsus! You look as if you had been
fighting a buzz-saw."

Yassah. I was in dat smash-up in
de Bucktown wheelmen's race."

"I heard about that. How did it hap-
pen?"

"Dallas fell out'n de pacemaker's pocket
right in de middle ob de race."—Cin-
cinnati Enquirer.

"It makes a woman feel better to cry,"
remarked the observer of men and things.
"She gets lovely prismatic effects by
looking at things through her tears."—
Detroit Journal.

KEEP CLOSE WATCH!

Look to it that You are well Guarded
Against that Stealthy Enemy,
Kidney Disease—South American
Kidney Cure is the Only Remedy
Which will Relieve at once and
Cure.

Michael McMullin, of Chesley, writes:
"I had been troubled with gravel and
kidney disease for eight years. At times
the pain was so severe I could not lie in
one position for any length of time. I took
South American Kidney Cure according to
directions. I got immediate relief. The
soreness and weakness all left. I can
testify to the remedy being a wonderful
cure." This stealthy enemy will not quit
you by using pill doses. It must be a
kidney specific—a liquid that will dissolve
all the substances and carry them off
through nature's channel. South Ameri-
can does this. It is a liquid and never
fails to cure. Sold by A. W. Grange &
Bro.

other ways of raising the large sum now
necessary to carry on the affairs of the
province.

In addition to the officers appointed at
the annual meeting, held a short time ago,
the following were appointed directors.
For Napanee, Dr. Leonard; Ernestown,
Geo. Ham; Bath, J. J. Johnston; Adol-
phustown, Jacob H. Roblin; Richmond,
Ira B. Hudgins; S. Fredericksburgh, C.
Allison; N. Fredericksburgh, H. Meng;
Amherst Island, Alex. McKee. This
brought the business of the meeting to a
close, and Mr. Aylsworth took the platform
and announced his intention to accept the
nomination.

This was received with every demonstra-
tion of applause, and Mr. Aylsworth was
assured of the hearty support of all
present.

There was a little feeling of chagrin
among some of the Reformers present,
caused by the iron bounties. We can't say,
of course, not having yet asked the ques-
tion, how Mr. Aylsworth feels about the
iron bounties, but probably he thinks as
does the Express, that this bounty and
subsidy business must soon come to an
end.

The Only Perfect Dye stuffs in the World.

The scientific preparation of dyestuffs
and putting them up in proper shape for
family dyeing has been brought to perfec-
tion by Wells & Richardson Co., who are
proprietors of the celebrated Diamond
Dyes.

These popular dyes have banished from
the homes of Canada madder, fustic, log-
wood, cochineal and all other antiquated
dyestuffs. The work of home dyeing is
now done quickly and successfully by
Diamond Dyes; the process is one that
would astonish our grandparents.

To day millions all over the world use
the scientific Diamond Dyes in preference
to all others. Diamond Dyes commend
themselves to all who use them, because
they are the strongest, brightest and fastest,
and the easiest to work with.

Diamond Dyes, like all other perfect and
popular preparations, are largely imitated
in style of package and the way they are
put up. These imitations are worthless
and adulterated dyes, ruinous to all kinds
of goods and dangerous to handle. Great
caution is advised when buying dyes for
home use. Ask only for the "Diamond";
see that the name is on every packet.

Mrs. Maloney—Say, Mike, what's this
arbitration stuff I read about in the
papers? Mr. Maloney—I dunno exactly,
but I think it's something like prize
fighting. They take it out in talking.—
New York Press.

After the Proposal.—She—Why do you
look so worried, Bertie? Did papa ob-
ject? Bertie—No, but he said: "It's all
right. You'll soon find out it's useless to
kick when Nellie's head is set on
anything."—Brooklyn Life.

"No, I didn't have a very good time,"
she said. "I wanted to talk and there
wasn't a man there." "But there were
plenty of other girls." "Oh, of course,
but that was no satisfaction, for they
all wanted to talk, too."—Chicago Post.

"Popper," asked Bobby, "what are the
pacifiers?" "Why, they are the Cubans
who are not fighting," answered
Mr. Ferry. "Then are the Cubans who do
fight the atlantics?"—Indianapolis
Journal.

S. P. Rockett—There comes Scorchier;
let's turn down this alley and escape
him.

P. Ed. Estrian—What's the matter
with Scorchier? Are you and he no longer
friends?

S. P. Rockett—Yes; but he'll insist on
explaining the merits of the Dingbat
wheel, and I want to impress upon your
mind the superior points of the Dogwood
make.—Omaha World-Herald.

Wanted—An Idea Who can think
of some simple
thing to patent?
Write JOHN WEDDERBURN & CO., Patent Attor-
neys, Washington, D. C. for their \$1.00 paper offer
and list of two hundred inventions wanted.

They Are Good. Mr. Jas. Hagan, the
well-known ex-alderman of Kemptville, Ont.,
says: "For some years I have been greatly
troubled with pain across my back. Urinary
troubles caused me much loss of sleep, and I
suffered from a tired worn out feeling. Doan's
Kidney Pills gave me relief in a short time.
The pain in my back has disappeared, and I feel
that I would be doing wrong not to recommend
them to others suffering as I did. They are the
best medicine I ever used."

Nor was this the worst. After pre-
scribing all sorts of villainous com-
pounds, which Miss Malvina's organ re-
jected with scorn, Dr. Calomel insisted
that Miss Malvina should come to his
private sanitarium, known as The Rest.

Mrs. Smithers was as one demented.
She fumed and raged and almost tore
her false hair, for the board alone, with-
out medical attendance, was \$25 a week.

But Dr. Calomel was quite as de-
termined as she was, and at last, after
a fearful struggle, he won the day.
Mrs. Smithers can hardly be said to
have given in gracefully, for as soon
as the doctor went away she flounced
into the miserable little hall room she
allowed Miss Malvina, and where the
poor thing was having a wrestling
match with her organ, and exclaimed,
vindictively:

"I wish that 'organ' of yours was in
Gehenna!"

Poor Malvina! she wished so, too, if
she didn't have to accompany it there,
but it was not transplanted just for the
wishing.

A few days later, in fear and trem-
bling, Miss Malvina drove up in
Dr. Calomel's own neatly-appointed
brougham to the door of the Rest.

At the time of her arrival there were
only three other patients—Mrs. Weeks,
a chronic dyspeptic; Miss Paine, a com-
bination invalid; and an old gentleman
who was a bundle of nerves.

It was against the latter individual
that Miss Malvina was particularly
warned, the slightest irritating circum-
stance causing him to tear his hair and
cry "Fire!"

For a week Miss Malvina rested, lying
quietly on a neat little white bedstead,
gazing at harmoniously-tinted walls.
On the eighth day she was so much im-
proved that she came down to dinner.

It was a unique banquet. The con-

vives all brought bottles and spoons
with them, and some took their drops
before eating and some afterwards.
Moreover, the bread was dry and the
drinking water was hot.

Miss Malvina was introduced to her
fellow invalids, Mrs. Weeks and Miss
Paine, who were already at the table
when she entered, and she was having
a very nice time with them, comparing
symptoms, when a footstep and a man's
voice caused her to look up. Then there
occurred to poor Miss Malvina the one
event of her life.

The gentleman of the nerves and ec-
centric tendencies was none other than
her old admirer, Col. Wilds.

Miss Malvina started and blushed and
recognized him in a moment. His hair
had turned white and he no longer wore
a uniform, but he was the same gallant
man—indeed, age had improved him.

Col. Wilds recognized Miss Malvina
also, and their meeting was an interest-
ing one.

"Why, bless my soul, Miss Malvina!"
cried the colonel, "to think of our com-
ing together again after all these years
and under such delightful circum-
stances. What's your trouble?"

"An organ," murmured Miss Malvina.
"Only one?" exclaimed the colonel.
"Why, I've got a thousand, and every
one of 'em out of tune!"

Miss Malvina said she was sorry, and
began inquiring about his symptoms.
The colonel entertained her with a
list of the most intense horrors, and
the meal passed off delightfully.

After dinner they played dominoes. It
was a party of ghosts—pale faces,
wasted hands, an occasional groan, en-
tirely.

SCIATIC, OUCH!!!

**Excruciating Pains—Have You Suffered
Rheumatic or Sciatic Pains?—
South American Rheumatic Cure
will Relieve in 6 Hours and Cure.**

"I suffered intensely with rheumatism
and sciatica in my left hip. I tried a great
many remedies and a number of physi-
cians, but they could do very little for me,
only giving at times a little temporary
relief. I saw South American Rheumatic
Cure advertised and decided to give it a
trial. The first few doses benefited me
wonderfully, and after taking only two
bottles the pains disappeared, and there
has been no return. I consider my cure a
marvel, as I had been so bad for two years
that had I been given the whole universe
I could not lie on my left side." E. Errett,
Merriockville, Ont. Sold by A. W. Grange
& Bro.

Cancer can be Cured. For six years
I suffered from cancer, and got no relief until I
bottles of Burdock Blood Bitters. I used seven
bottles of Burdock Blood Bitters, then the cancer gradually
dried up and finally disappeared. I am now
entirely well and rejoice that by using B. B. B.
I have escaped death either from the surgeon's
knife or from the cancer itself.
Signed, MRS. ELIZA J. TUFFORD.

ONE OF THE MOST PAINFUL OF
MALADIES.

ABE LINCOLN'S LOST LOVE.

The Story of the Woman Who Was His
First Sweetheart.

An interesting story of Abraham Lincoln's first and most ardent courtship has just come to light in the little mountain Californian town of Calistoga, where the martyred President's early love dwells, a sweet old lady of 84.

Mrs. Susan Boyce is the name of the charming octogenarian, who, as Miss Susan Reid, of New Salem, on the Sangamon River, in Illinois, refused to marry the immortal war President in 1836. She dwells in a humble little cottage with her widowed sister, who is but a few years her junior. Her husband has been dead for many years, and her principal income is a pension which she draws by reason of injuries her husband received in the famous Black Hawk war while fighting side by side with Lincoln, whose friend he was.

Mrs. Boyce is an unusually bright woman, whose mental and physical powers are well preserved, and there is character in every expression, in all she says and does, even to the slightest nod or gesture. She is about such a woman as one familiar with Lincoln's early life might suppose he could have loved, for she still has a rugged beauty in spite of the snows of age, and it requires little effort to imagine that she was a remarkably handsome girl in 1836—not a doll-faced creature, but a woman of marked character. She is tall and statuesque in appearance, and her eyes are a grayish blue.

Sitting on the front porch of her humble home, Lincoln's first sweetheart was a beautiful picture of serene old age. Her speech flows gently and without a tremor as she recalls events of her girlhood thoroughly, yet without hesitation.

Clad in a plain black dress, with a becoming white cap, she folded her arms and gazed toward the mountains that rise gently a few hundred feet beyond the front yard, and said:

"I can truthfully say that I have never been sorry that I married Mr. Boyce rather than Abraham Lincoln. You ask why, perhaps? Well, I'll tell you why. I have always been a believer in love, in romance, in idealism. I have been a novel-reader and a lover of poetry.

Insanity In Summer

BROUGHT ON BY NERVOUS
AND MENTAL TROUBLES.

Paine's Celery Compound
The Great Tower of
Safety.

Nervous diseases when aggravated by mental disturbances produce more cases of insanity in the hot weather than at any other season of the year.

Nervous headache, nervous dyspepsia, sleeplessness, and chronic constipation induce depression of spirits, extreme weakness, morbid fears, dependency and languor; from these dread insanity comes slowly and surely.

Nervous sufferers have a dread of hot weather. Finding themselves deeper in the pit of misery than they were in the spring and early summer they are in utter despair. Thousands whose cases have not been met by treatment they are now under are loudly calling for help.

There is hope and rescue for you, reader, if you are one of the sufferers. You are in need of Paine's Celery Compound, that great builder of the nervous system. Its vitalizing action commences with the first bottle you use. You soon begin to realize that you are daily drinking health. The volume of blood immediately increases in the arteries, and the body is fully fed and nourished. Your appetite becomes keen and natural, the tired nerves and brain are strengthened, and you feel impulses of health that cheer the soul.

The power of Paine's Celery Compound over nervous summer diseases is admitted by tens of thousands who have used the marvellous medicine. This remarkable remedy will most assuredly meet your case and give you a new life; it will lay the foundation for future happiness and long years. Weak, wretched, and infirm reader, we counsel you to make use of this life-restorer at once, and enjoy the true blessings of health.

A CYNOSURE.

His front name was Adolphus and his surname it was Brown. The girls all said his mustache was the prettiest in the town. His hair was a deep auburn and it crinkled up in curls. That made him the cynosure of all the village girls.

Now, being a cynosure, he had more or less correct, You could see it in his manner when he

Miss Malvina and Col. Wilds sat down to a tete-a-tete game.

Miss Malvina could not help noticing how handsome her former lover had become, and how highly polished and pink his bald head was.

They were having a most charming game, when suddenly a moth miller sputtered into the gas and fell whizzing among the dominoes.

Immediately Col. Wilds went off. Poor Miss Malvina was so overcome she scarcely knew what to do. Not liking to sit gazing at her old friend, who was behaving himself in a most childish and foolish manner, she hastily arose, and, walking across the room, took from her pocket a small box from which she extracted an "excitement pill," which she swallowed.

In a moment the colonel was at her side.

"Miss Malvina," he cried, "what is it? You are ill?"

"It's only my organ," faltered Miss Malvina.

In his courtly sympathy Col. Wilds forgot his own ills.

After this for a week he and Miss Malvina sat down tete-a-tete, and during that time he never once exhibited a nerve, and she almost forgot that she even had an organ.

But happiness in this world is short lived and Fate is a cruel jade.

On the eighth evening, when the colonel and Miss Malvina were enjoying the most harmonious game of dominoes they had yet played, and when each was tenderly reluctant to beat the other, a note was brought to Miss Malvina.

She tore it open and read:

"Dear Malvina—I pay for no well persons. I hear that you have entirely recovered, and that that miserable organ of yours performs its functions like a Christian.

"Come home at once."

Miss Malvina laid down the note and a tear fell among the dominoes.

"My dear Miss Malvina," cried the colonel, sympathetically, "what is troubling you? Tell me, I beg?"

"Alas! Col. Wilds, I must leave this haven of rest."

"But why?"

"My aunt refuses to pay my board any longer."

"Allow me to do so!"

"Oh! Col. Wilds!"

"Why not? I'm a millionaire, unmarried and of age!"

Miss Malvina blushed like a school-girl.

"You are so kind—but what would the world say?"

"Nothing, if you will follow my wishes."

"What are they?" inquired Miss Malvina, innocently.

"Be my wife!"

"But Col. Wilds, my organ?"

"No objection whatever," answered the colonel, cheerfully; "it counteracts my nerves."

Poor Miss Malvina; all the physics in the world had been tried upon her and all had failed, for no one had ever thought of giving her a dose of happiness. That dose being administered, her recovery was rapid and complete.

One day there was a quiet little wedding to the West, and afterwards, as Miss Malvina—Miss Malvina no longer—threw all her medicines out of her window, she said to herself:

"Dear me; did I ever think I'd live to see the day when I would bless my organ?"—Ladies' World.

A New Source of Power.

A new and simple source of power is proposed for engines and is declared to be not only practicable, but advantageous in respect to the latter, it being claimed that the material producing the power can be used continuously without the necessity of renewal. According to this idea, originating with Hermann Poppe, of Hamburg, Germany, a mixture is employed of ammonia vapor and carbolic acid gas, eventually under access of steam, which, however, is not essential, and thus, by the expansion of the gas mixture entering under pressure, a cooling of the vapors in the cylinder of the engine is produced. In this way a salt of ammonia is formed by a smaller or larger part of the gas mixture, and this salt, as provided in the subsequent operation, is returned to a disintegrating apparatus, working under pressure, in order to be disintegrated by heat into its volatile components, which latter are again utilized for power purposes.

A New Record.

"Munson now holds the record for meanness."

"Why?"

"He bought his engagement ring on the installment plan. The girl gifted him the other night, and now he has signed his claim to the ring over to the man who sold it to him."—Philadelphia North

Mr. Peter Millar Suffered for Years, and Experimented with Many Medicines Before Finding a Cure.
From the Brockville Recorder.

Perhaps no prettier place is to be seen in Ontario than that at Newman's upper lock on the Rideau Canal. At this station for a quarter of a century resided Mr. Peter Millar, who during that period acted in the capacity of lockman, and was perhaps the best known man on the canal. Mr. Millar is now a resident of Merrickville, having retired from active life. To a correspondent of the RECORDER he related the following experience: "For many years I was troubled with a lame back, which gave me great pain at times, and caused me much loss of sleep. I tried different kinds of medicine but found little or no relief. The spring of 1895 I was assisting at getting out ice one day when I felt something snap or give way in my back, and it was some time before I could straighten myself up. I now became so bad that when I laid down I was unable to rise without assistance, and I fully made up my mind that I had become a chronic invalid, and never expected to see a well day again. A couple of weeks after my back had almost entirely given out, I saw by an article in a paper that Dr. Williams' Pink Pills had cured a person troubled similarly, and I immediately sent and procured a box to test them. Before I had finished the box I found my back somewhat stronger so I procured five boxes more and by the time they were used I found myself completely cured. Since I took the last box I have not had a pain or particle of lameness, and my health has been far better than it had been for years before. To ensure obtaining the genuine always ask for Dr. Williams' Pink Pills, as there are many pink colored imitations.

No. 4 Common Carrier.
"George, I wish you'd leave this little package at the express office."
"Me carry a bundle? I guess not. Besides, I've got to lug both my tires and a handle bar down to the repair shop."

The Funny Part.
She—Don't you see anything funny about Chimmie Fadden?
He—Yes; it's funny that anyone should see anything in the stuff to laugh at.—Somerville Journal.

Something of an Admission.
"Of course, all my aunts say that the baby looks like me," said the blushing young man.
"What does your wife say to that?" asked the older man.
"Well, she admits that perhaps I may resemble the baby a little."

The New Parasols.
German red silk, leaf-green and watermelon pink are seen in the new smash ads. A chiffon cover overlays the pink and green. The red would either have a black transparent cover or shine with undiminished radiance without any cover.

"IN SICKNESS AND IN HEALTH."

Man and Wife join Hands in Proclaiming the Great South American Nervine King of Cures for Stomach Trouble and Nerves.

Mr. S. Phillips, of Warton, Ont., writes: "I was very much emaciated by chronic dysentery and dyspepsia for a number of years. No remedy or no physician seemed to successfully cope with my case. When all else had failed I read of the cures being effected by South American Nervine. I decided to give it a trial. Before I had taken half a bottle I was much improved and felt greatly relieved. A few bottles of it have made me a new man. I am better and healthier than I have felt for years." His wife was also a great sufferer from stomach trouble and headaches. She says: "Seeing the wonderful effect it was having on my husband, I tried it also. The remedy gave me almost instant relief, and has cured and made a strong woman of me." Sold by A. W. Grange & Bro.

Lincoln's First Love, Mrs. Susan Boyce.
I believe, too, in fate. It was not fated for me to marry Lincoln. He was an honest young man, but I did not love him. Why? I don't know, but I do know this, love is a thing that you can't force. In the first place he was homely, and very awkward. He was only a common rail-splitter when I knew him, but he studied hard in his little cabin, and he was very entertaining. I never saw him after 1837 and I never heard him make a speech.
"He used to talk of the stars a great deal, and he seemed to me a very queer fellow. I was only a girl when I knew him, for I was born in 1815 in Kentucky, and I first met Mr. Lincoln in 1836 at the home of a neighbor named Abbe. We were both guests at the house for the day. There were many young folks there, and I remember that Lincoln was very bashful. My father was at that time one of Lincoln's best friends. His name was Lewis C. Reid, and he took Lincoln to Springfield and introduced him to William E. Seward, from whom he borrowed the first law books he ever read. He and my father were of the same political faith, and they often talked politics by the hour.
"But the smooth-faced and awkward young man whose memory the nation has long revered soon began to pay me more attention than he did my father, and this pleased my father more than it did me. In those days there were no buggies to speak of, and the way young folks courted was to go out very often on a horseback ride together. Mr. Lincoln often took me out horseback riding, and though he was not as ardent a wooer as I've seen since he kept his case going pretty lively and pressed me very hard for an answer. He pretended that he never loved a girl before and would never love anybody as he loved me, and I think he meant what he said, but I did not want to marry him, much as I liked his common-sense, his absence of airs, and his great honesty, so I invented a story.
"I told him I was engaged to a young man in Kentucky, but he did not give up for this, though it cooled his ardor a little for a time. Finally he told my father he would call one day for his final answer, but I made it a point to be away from home and he never got over it. My father lectured me severely for my conduct. He wanted me to marry Lincoln and he afterwards told me what a little dunce I'd made of myself, but my mother took my part, for she believed love was a thing for each individual to settle in his or her own heart. I can say that I have never for one moment regretted that I did not marry Mr. Lincoln, for if I could not give a man my whole heart I'd never marry him for money or position."
Mrs. Boyce says she has often felt proud in a way that she knew so good a man as Lincoln and had his love and esteem, but she says such a thing as worrying over what "might have been" has never crossed her mind for a moment, as she is a fatalist pure and simple. "After more than three-score years," she said, "I can say that Lincoln was one of the best friends I ever had and one of the squarest men I ever knew. If he were alive to-day I'd be getting a bigger pension from the Government for each of what my father and husband did for their country in the Black Hawk war."
The remarkable old woman who enjoys the distinction of having filed Abraham Lincoln, says The San Francisco Call, has blue eyes and silvery hair, though it was once raven black. She is five feet seven inches tall, and is still active on her feet.

Value of Nuts as Food.

It is popularly believed that nuts are indigestible, and doctors agree that nuts and raisins after a full meal, or rich nut cakes, puddings or fritters, cause dyspepsia; but this is because they are eaten as luxuries after the appetite has been satisfied. Nuts, if well masticated, and eaten not as dessert, but in place of other food, are more nutritious and sustaining than many fruits and vegetables, and are said to be especially valuable as brain and nerve builders. They may be eaten uncooked, in the usual way, or in sops, sandwiches, salads, or cooked with vegetables; for instance, egg plant with nut stuffing. Peanut or chestnut sandwiches are an approved delicacy.

CASTORIA.
The little signature is on every wrapper.
Nature's Medicine. Nature's Medicine for constipation, liver complaint, sick headache, biliousness, indigestion and hollow complexion is Castoria Liver Pills. They are a perfect laxative, never griping or giving pain. One pill each night for 30 days will cure constipation.

His very air proclaimed aloud to everyone in town: "Say, don't you think I'm handsome? My name's Adolphus Brown."

Well, so it went for several years. Adolphus cut a dash, but being a cynosure doesn't pay in ready cash. And, finally, his father brought the youth up with a jerk. And he said, says he: "Adolphus, you have got to go to work."

Now, when Adolphus heard these words, and thought what they implied. His first thought was that he would go and be a suicide; But of nerve to swallow poison, he found there was a lack, and the thought of a revolver sent cold shivers down his back.

And so Adolphus still survives, with his mustache and his curls, and he still is a cynosure for all the village girls.

In fact, he's rather more so now than he ever was before.

For he's selling lace and ribbons in McCloskey's bargain store.

—Somerville Journal.

The Modern Papa.

"Pa, Mr. Withers will ask you for my hand pretty soon."

"Who is Mr. Withers?"

"He is the gentleman who has been spending his evenings here for the past three years."—Life.

Homemade Case for Shirts.

Shirts take a great deal of room in a pertemanteu when packed in the ordinary way, but if enclosed in a neat case of this description they are not only

HOMEMADE SHIRT CASE.

kept compact, but tidy and clean into the bargain. The case should be made of colored linen, either of China blue, straw or rose, pink, and may be embroidered with springs as shown in the sketch. It is lined with straw-colored linen, and if it is necessary to make it more stiff, an interlining of tailor's canvas may be used. The edges are machine stitched, and the case ties with bows of ribbon.

A Famous Markswoman.

Mrs. David Day, of Duluth, probably handles a shotgun better than any woman in the country. She is at present attending the gun club meets throughout the West in the interest of The Western Field and Stream of St. Paul. At Des Moines recently, the first day of the shoot there, she tied Heikes, the champion of the United States, at inanimate targets. Later she was tied with Budd and Grimm, the champions of Iowa. A Des Moines paper says of her work: "The score made by Mrs. Dr. Day, of twenty straight targets out of a possible twenty, was considered the feature of the shooting yesterday. It won her first money in the particular match. Her shooting was very pretty and her manner excited most favorable comment. She was quick as lightning and broke every target square, not finding it necessary to claim scratch hits."

LAXA-LIVER PILLS

CURE

**BILIOUSNESS
CONSTIPATION
SICK HEADACHE
AND ALL LIVER TROUBLES**

As a laxative, one pill acts perfectly, and if a stronger action is desired a cathartic effect is produced by two pills. In obstinate cases, where a purgative is necessary, three pills will be found sufficient. These pills leave no unpleasant after effect. One pill taken each night during thirty days will cure constipation.

PRICE 250. ON 5 FOR 21.00

Things We Ought to Know.

- That an attractive table will cause a husband to come home regularly to his meals.
- That books, flowers and pictures are always acceptable to the sick.
- That cranberries are healing to the throat and will frequently prevent soreness.
- That all left-overs should be placed in china dishes—never in tin.
- That children should be carefully trained to breathe through the nostrils.
- That polished steel may be kept from rust by giving it a light coating of olive oil.
- That hoarseness and cold in the chest may be greatly relieved by rubbing the chest twice a day with olive oil.
- That the bride's cake is an older institution than the wedding ring itself.
- That children should be taught that to help mother is a pleasure rather than a duty.
- That it is more economical to buy a good article rather than a cheap one.
- That when boiling a lobster or crabs a half teacup of vinegar will sweeten and whiten the meat.
- That a good gloss may be given to collars and cuffs if a little turpentine is added to the starch.
- That a daily salt water bath given to a delicate child will greatly strengthen it.
- That a penny saved is a penny earned.

Shirt Waists Up to Date

Of course a shirt waist, to be a shirt waist, must conform to certain rules, but it may be decorated according to fancy. Very dainty little summer shirt waists are made of plain muslin in bright colors and are quite as stylish as those of silk. A smart cotton shirt waist is built of delft blue chambray, with a pointed yoke at the back, small tucks forming a yoke effect in front. Plaid waists, in both cotton and silk, are en vogue, and are finished with a belt of plaid and stock of the same. These are shown you by the dealers as the latest novelties. They will be much worn throughout the summer season with crash and linen skirts.

Not to Be Expected.

Recently in Belfast two farmers who had come in for the weekly market, after transacting their business, made their way to a public building, where the portrait in oils of a local church dignitary was hung.

The harsh, ascetic countenance of the reverend gentleman was by no means softened by the slovenly manner in which the colors had been laid on.

After a short and silent view one of them broke forth with the remark that "this riverance had nae a very pleasant face."

"Houts, man!" rejoined the other; "cud ye expect the like after sich a dose o' oil!"—Answers.

A Large Order.

A hureculan Scots Grey passing along Princes street, Edinburgh, one day stopped at the postoffice, and called on a shoeblack to shine his boots.

The feet of the dragon were in proportion to his height, and, looking at the tremendous boots before him, the arab knelt down on the pavement and called out to a chum near by:

"Janie, come owre and gie's a hand; I've got an army contract!"—Answers.

Slighted.

Four-year-old Barbara went to church with her two sisters and came home crying.

THE NEW FASHIONS.

Kate Reilly, the London Fashion Correspondent, Gives Pointers.

Paris has issued her fiat, but Paris is no longer omnipotent in our great world of fashion. Inventive she may be and cunning in devising new shapes and color combinations, and then, she has tradition in her favor, since from time immemorial the words "Paris" and "Fashion" have been almost indissolubly united. On the other hand, however, she often makes mistakes. The modistes in France are comparatively few. The really smart English women are tremendously superior to any other women in the world, and they buy as much in their own capital now as in Paris.

Women often halt between two opinions, and not even sartorial talent can declare what will be the most popular among many innovations. The width round the shoulders is sensibly decreased, but I shall make very little alteration in the circumference of the skirts; which, although no longer so stiff as of yore, are still very wide and often trimmed to look wider. The newest skirt of all and the prettiest is accordeon-plaited, narrow at the waist and widening out at the bottom, and is known to fame as "La Soleil." In foulard and creases the happiest effects are obtained, these being the summer materials par excellence.

Here is an evening gown on which I am prepared to pin my faith. It is made of a mixture of orange-hued mirror velvet and satin, the velvet coming up in an irregular line onto the skirt, but the joining is cleverly concealed by the rich embroideries of diamonds, silver and blue pearls in exquisite trailing design. Sometimes, as the light catches it, satin and velvet both seem the same shade, then a shadow falls upon it, and the orange velvet blends imperceptibly into lemon satin, with the silver, the diamonds and the pearls shimmering over all. The bodice draperies are arranged in like fashion, but with a softening of chiffon, and the mauve orchids, which adorn one sleeve, are made of deep-hued velvet, shading into paler silk.

Another evening gown is of white satin, with straps of diamonds, emeralds and pearls embroidered on the bodice, and with this I suggest a garniture of rose red, pale pink and paler mauve, sweet peas, and a full, plain, satin skirt.

A popular street frock has an accordeon plaited skirt and bolero coat, made of wine-colored face cloth, combined with claret velvet. The coat is slashed and bound together again to fit the figure perfectly with stripes of broad, black braid. Tabs of this velvet are thrown back in front, and at the back are wired revers of point lace over gray, with edgings of chinchilla, while the creamy old point lace falls over a vest of pale blue silk. Such a gown is well adapted for wear on cool days, and is admirable for seashore service.

Skirts must fit snugly about the hips to be stylish; all fullness disappears in the plaited ones as the waist line is approached.

KATE REILLY.

An Even Thing.

"Sir," began the man with the newspaper in his hands, as he turned to the man on his right, "this is an age of deception."

"I quite agree with you," was the reply.

"Nothing is what it seems to be."

"No, nothing."

"For instance, you are trying for the last twenty minutes to get hold of my watch. I wear a chain, and the natural inference is that there is a watch at the end of it."

"But there is no watch?"

"No, sir. I wear the chain for an ornament. You have simply thrown away your time."

"And on your part," said the man who had failed, "you took this pin in my scarf for a real diamond, and have made no less than three trials to secure it."

"And it is not a diamond?"

"No, sir—only a dry goods store rhinestone, but I wear it for ornament, and it serves my purpose. You have wasted your energies. It's an even thing, and let's go for that old duffer as he gets off the car and whack-up on the boodle."

Riches in Sight.

The beautiful young girl flung herself at her stern father's feet.

"Oh, father," she moaned, "why withhold your consent? Jack and I love each other dearly. Why should you wreck the happiness of two lives by not permitting our marriage?"

"Girl," the old man replied harshly, "you know full well that although considered wealthy, I am in reality tottering on the verge of ruin. The only hope I have of retrieving my fortunes is the possibility of your making a good match. You know this, and still you persist in pleading for that beggar, Jack Austin. No, you shall never marry him, so make

A GAME OF TAG.

I was looking from the window,
At the garden yesterday,
Where, beneath the bare old oak tree,
A heap of brown leaves lay.
When, suddenly, the north wind
Came frolicking that way
And up the brown leaves started
And "Tag" began to play.

Like airy sprites, all over
The garden they did flit,
And never seemed to falter
In their mad race a whit.
And, though I saw that many
Were by the others hit,
So fast they went that no time
Could I tell which was "it."

WINSTON'S REQUEST.

By HELEN BEEKMAN.

"Oh, yes, sentiment's well enough in its way, but, after all, one needs substantial food upon which to live. It's an old adage about love flying out of the window when poverty enters the door, but its very age enforces our reverence. If it had not been true it would not have been handed down for so many generations," and the speaker, Star Ralston, leaned back with a saucy smile on the lovely face, the eyes, which had given her her name of Star, searching those of the young man, whose own face had paled under the words.

"Then wealth is an absolute necessity to your happiness, Miss Ralston?" he half questioned, half asserted. "Are you sure, quite sure, nothing could fill the gap its loss would make?"

But some one entering checked the answer on the girl's lips. What needed Dale Ferrars more? Had he not already heard that which doomed him?

"Hullo, Dale! What is it now? You are pale as any ghost," exclaimed a voice from the depths of an easy chair, a voice smothered in clouds of smoke, as Dale Ferrars, an hour later, entered his room, to find Elliot Winston already in possession. The two had been friends for years, sharing the same suite of apartments, and brothers in all but the tie of blood; yet many wondered at the close intimacy between them. One nature was frank, open, trustful; the other cold, cynical and suspicious.

"It's no use, Elliott, old fellow," Dale answered, throwing himself in a chair opposite, "I can never win her!"

"And may I inquire whom the pronoun designates?" But around the questioner's mouth crept a wary smile, while his eyes grew steel-like in their hardness.

"Whom! Oh, Elliott, don't torment me

The jungles of Africa are not the only places in the world where a man courts death from an unseen foe. All the savages of all the barbarous nations of history have not slain one tithe of the men that have been killed by that dread assassin—consumption. One-sixth of all the deaths in the world are due to it.

Dr. Pierce's Golden Medical Discovery cures 98 per cent. of all cases of consumption. It cures by going to the very root of the evil—imperfect and improper nutrition. It corrects all disorders of the digestion, makes the appetite keen and assimilation perfect. It drives out the impurities from the blood and fills it with the life-giving elements that build up the body. It is the greatest blood-maker and purifier. When you pump rich, red, healthy blood into an organ it cannot long remain diseased. This is true of the lungs. New healthy tissue is built up in them and the germs of consumption are driven out. Thousands have testified to their cure by this great remedy. Druggists sell it.

Ralph Green, Esq., of Williamsburg, Callaway Co., Mo., writes: "Before I commenced your treatment I could not take a drink of water without great suffering in my stomach. I could not eat. I was fast sinking and did not weigh more than 15 pounds. To-day I weigh 157. I had five different doctors examine me, and each one treated me without doing me any good. At last I took four or five bottles of your 'Golden Medical Discovery,' and to-day am in better health than I have been for five years. Whenever I see any of my friends suffering I tell them of your medicine and advise them to write to you."

It is better to do mending while the damage is slight, than wait until the whole structure is ready to fall. Constipation is the one, all-embracing disorder that is responsible for many other diseases. Pleasant Pellets cure it. Druggists sell them. They never gripe. One little "Pellet" is a gentle laxative, and two a mild cathartic. They are tiny, sugar-coated granules. Nothing else is "just as good." A permanent cure.

ston. Dale Ferrars could not appreciate the priceless boon he might have had. He has proven himself unworthy. But there is one who loves you with a love which will go with him to his grave; who has loved you silently all these years. It is my own cause, I plead, Star. Oh, though I prove so poor an advocate, be merciful and let me win my

her mother, "I preached a whole sermon—about M. Mary and Martha," sobbed Barbara, "and—never said—a w-word about me."

Remove Grease From Wool.

To remove a grease spot from woolen or silk, thoroughly saturate the place with turpentine and place a soft piece of blotting paper underneath and another on top of the spot and press very hard. The fat is dissolved, then absorbed by the paper and is entirely removed from the cloth.—Brooklyn Eagle.

FARMERS ATTENTION.

Insure your property in the Lennox and A. Kingston Mutual Fire Insurance Company. Because it is a Home Company. Because it is a Safe Company. Because it is the cheapest and best. Because it affords the most liberal policies to patrons.

Because it insures only (isolated) non-hazardous risks, as farm property, county churches, hall and school houses.

Because it is the Farmer's Company managed by Farmers in the interest of farmers of the Counties of Lennox and Addington, Hastings, Frontenac, Lennox and Leeds.

Officers—J. B. Aylworth, President; B. C. Lloyd, Vice-President; Directors—A. C. Parks, U. C. Sills, W. R. Gordanier, I. P. Aylesworth, Honorary Directors—Jas. Ried, M.P.P., A. V. Price, Camden, C. M. C. BOGART 8th E. Treas

"But father," she cried, "I am not too severe? Jack's prospects are of the brightest. To-morrow he starts in business for himself. He will open a bicycle repair shop, and—"

"What, girl! Say you so? A bicycle repair shop? Faith, this was never mentioned to me before. He'll grow as rich as Croesus. Yes, my darling, you can marry him, and this very day, if he will. Your old father will save himself yet. And to think I nearly lost him!"

The Natural Mistake.

"Blimey! but they'll think I'm a bloomin' harlotist in these togs!"—Phil May, in Pick-Me-Up.

one woman in the world, and that one Star Halston."

"You mean you have proposed to Miss Ralston and been rejected? a flash of triumph passing swiftly across his face."

"No, not that. I had made up my mind to say the words to-night, but—oh, Winston, it's the old story—money, money."

"A fortune-hunter like the rest, is she, my boy! Don't be discouraged. To bed and dream of the good the Fates hold in store for you. Follow my example—let nothing interfere with your rest, and rising with a yawn, he disappeared through the communicating door into his own bedroom, but with it once closed between them the mask fell from his features, an angry frown gathered on his brow."

"He loves her, and is so blind that he does not see how entirely she returns it, and I—I love her, too; yet with all my gold I cannot buy one smile such as she wastes on him. But by fair means or foul I will win her yet."

"You've lost this money, Elliot—\$20,000 in bonds—here from our rooms!" exclaimed Dale Ferrars a week later, confronting his friend, who had just overthrown him with the terrible news.

"It's bad enough!" the other answered, but his eyes wandered restlessly about the room, never meeting the frank, open gaze of his friend, while the deadly pallor on his cheek bespoke a sleepless night and a mind ill at ease.

"But are not the bonds marked in some way that you can identify them? Have you no clew to the thief?"

"Yes," he answered, "I have their numbers, and this is the worst part of it, Dale, old fellow; you know, of course, I don't believe it, but the detectives who have the case in charge insist upon searching your things—"

"My heaven, Elliot! And you would permit it?"

"Not if I had my own way for a moment, but it has gone beyond my jurisdiction, they say, and in fact, they are waiting in the next room now. It's all a matter of form, Dale, after all. Let them go through it, and they will be content—"

"Bid them enter," commanded the young man, proudly, standing with knitted brows and folded arms, but the murmur: "Et tu, Brute," escaped through his clenched teeth.

Once as they opened his trunk he started forward. Star's picture was hidden there. How terrible that their eyes should defile it! But in another moment they interpreted the start according to their own satisfaction, as from a compartment from the very bottom of the trunk they drew forth in triumph the missing property, not a bond wanting.

"You'll trust us another time, Mr. Winston," he heard them say.

"I can't believe it yet; but go on further. The property is found. Do not expose him—"

"Too late for that now," they replied, as they stooped to slip the handcuffs upon him.

"Not that!" he exclaimed, breaking from them, a red flush for the first time signalling his share upon his cheek. "I am a gentleman, and will go with you as a gentleman, and, without one backward glance at the man who stood white and trembling by his recovered bonds, he turned and let the detectives lead him whither they would."

The city rang with the strange story and the noble efforts of Elliot Winston to save the friend who had betrayed him from exposure. Such unselfishness! Such rare nobility! But there was one who listened to the news without one moment's wavering in her pure belief.

"He is innocent," she said, when they had finished. "As innocent as I am. Dale Ferrars never was a thief!" But when in her own room she recalled the past her words, "as innocent as I am," rose once more before her.

"Am I innocent?" she questioned. Did I not always say money was my great ambition? If he did it, did he not do it for my sake? I, who would have gone to the ends of the world with him, waited on him, served him and asked no greater happiness—but he meant it. "My Dale could do nothing mean!"

"Oh, Mr. Winston!" exclaimed Star, a few mornings later, entering her drawing-room, where her visitor stood awaiting her. "How glad I am to see you—to see some one who shares my belief in Dale Ferrars' innocence!"

"Would that I could share it, Miss Ralston."

"But you do not! Are you not working for his release?"

"I can never forget that he was my friend. The world construes my efforts for him into belief in his innocence, and my loyalty keeps me silent; but, alas! I fear they are powerless. His guilt is too evident."

"He was never guilty!" rang out the clear, ringing voice, while the small head flashed. "I would stake my life upon it."

"Stake nothing so precious, Miss Ral-

cause he died rather than world!"

He had spoken too rapidly for the girl to check his words. The torrent would not be stemmed.

"I cannot," she at last made answer.

"And why?"

"Because," she answered, proudly, "I love the man you call a thief—love him so dearly that I would rather have a prison cell with him than tread a castle with any other."

"What if I tell you on your decision, rests Dale Ferrars' hope of acquittal? Do you love him well enough for such a sacrifice?"

"He would not wish it."

"What! he would rather pine long years in prison, disgraced and degraded? Listen, Star! If my wife, and I will take such measures as will not only acquit him of punishment, but the deed. With money I can buy a man who will swear he was the thief, and placed the bonds in Dale's trunk."

"And are you sure he would not swear truthfully?" was the quick retort.

"But too sure to the contrary. Come, Star, decide. Be my wife, darling, and I will surround you with every luxury and trust to time to win your love!"

"Go find your witness," she answered. "Bring him to me. If there is no other way I will accept this."

"In two days I will return with him."

His victory was in his hand. For this he had worked, for this he planned. This he had achieved, and a smile of exultation triumphed on Elliot Winston's face, as a few hours later, leaving Star, he leaned back in the comfortable railway carriage which was to bear him on his journey, and gave himself up to the delights of anticipation. Retrospect was less agreeable. But suddenly a sharp whistle rings out on the night air, a note of warning which strikes terror to every heart, which is followed by a crash, a glare, then blinding darkness.

Out from the mass of broken timbers they drag a man's form and tenderly bear him, with many other suffering victims, to a hospitable farm house near by. Death is inevitable. In a few hours it must ensue. Once more Star's face and form are with him—the one thing that, in all these years, has grown into that sealed heart. His happiness is over now. Hers must be secured, even at cost of truth and his fair name. What matters it what they say of the dead?

"Some one must write for me," he feebly says, and there are many to obey the call. "Darling," he dictates, "I have a sad story to tell you, but you will, I know, forgive the dead. Dale is innocent, dear, as you said. I stole my own bonds and placed them in his trunk. I was the thief and traitor as well. But I would have sold myself a hundred times to win one kiss from your lips. Use my confession to free him, but remember, I need not have made it. It is a bequest worthy of my love—darling—good-by—Elliot Winston."

With trembling hand he subscribed his own name, then sank back—dead.

Once more the story runs with the strange story. But this time Dale shared in its rejoicing. He was the hero of the hour, but it was in Star's eyes he found his triumph.—N.Y. Ledger.

Puzzling the Royal Society.

The proceedings of the Royal Society of London were not taken so seriously 150 years ago as they are now. A sailor who had broken his leg was advised to send to the Royal Society an account of the remarkable manner in which he had healed the fracture. He did so. His story was that, having fractured his leg, by falling from the top of a mast, he had dressed it with nothing but tar and oakum, which had proved so wonderfully efficacious that in three days he was able to walk just as well as before the accident. This remarkable story naturally caused some excitement among the members of the society. No one had previously suspected tar and oakum of possessing such a miraculous healing power. The society wrote for further particulars, and doubted, indeed, whether the leg had been really fractured. The truth of this part of the story, however, was proved beyond the shadow of a doubt. Several letters passed between the Royal Society and the humble sailor, who continued to assert most solemnly that his broken leg had been treated with tar and oakum, and with these two applications only. The society might have remained puzzled for an indefinite period had not the honest sailor remarked, in a postscript to his last letter:

"I forgot to tell your honors that the leg was a wooden one."—Harper's Round Table.

Acetylene-Gas Alcohol.

A French chemist has discovered that alcohol can be produced very simply and easily from acetylene gas, at a cost not exceeding 16 cents per gallon and that it would be free from the essences which render vegetable alcohols unwholesome as the main ingredient of liquors.

TRIUMPH OF SELFISHNESS.

A Summer Idyl at Very Many Mountain and Lake Resorts.

Crusty Bachelor—Do let me hold the too-ty wootsy treasure.
Nurse—Oh, Mr. Croaker, how kind of you!
Chorus of Mosquitos—Oh, what a cinch!

Establishing a New Cult.

"Oh, to be original!" sighed the young and promising author, as he glomily surveyed the empty page of foolscap before him.

"I can imitate Kipling," he murmured, thrusting his fingers through his unkempt locks, "and I can imitate Dickens—pretty well. I can even scribble something more or less Shakespearean once in a while. But what avail such? Nothing! I must be original. Originality is the only thing that counts these days, and without it it is hopeless to sue for the favor of the public!"

Suddenly an idea occurred to him. Planning out the simplest of plots, he sat down and wrote. Beginning at the bottom of the page at the right hand corner, he wrote to the left and up ward.

II.

The reception rooms of the well-known society woman, whose ambition it was to hold salons every week, to which were invited the literary celebrities of the day, were crowded to the very doors.

"Who is that pale young man, my dear, with the wavy hair and the spiritual expression, surrounded by all those girls?" asked one stout matron of another.

"That, my dear? Why, that is the successful young author who conceived the original idea of writing his stories backward."

"Writing his stories backwards? But what does he do that for?"

"They do say he did it just to be quite different from anybody else, but it has proved so popular with his young

SUMMER GIRL OF '97.

HER SHIRT WAIST, COLLAR, HAT, BUCKLES AND PARASOLS.

A Chief Feature in Her Make-Up Will Be Sweet Simplicity—An Endless and Fascinating Variety of Them to Charm the Sight of Men.

Simplicity, not flummery, will be the chief feature of the make-up of the Summer girl of 1897. Shirt waists will play an important part in her wardrobe.

The newest shirt waist is a thing of many tucks or plaits. The tucks, which are usually an inch wide, or even narrower, run horizontally over the entire waist. The newest sleeves are the shape of a man's coat sleeve, and are formed by a succession of the same width tucks that appear on the waist.

Another equally smart shirt waist is crossed and countercrossed by clusters of three tiny tucks, forming the effect of a large plaid.

Shirt waists destined for the tub are made with a small, inclined bishop sleeve gathered into a cuff at the hand. These shirt waists are made of dimity, dotted swiss, cheviot or china silk, and have their quota of tucks and plaits, though differently disposed. The pret-

The Experiences of the Amateur on a Catboat Trip.

It will be remembered that the man who gets the half holiday off played baseball last week, and retired from the game with his spirit and several of his fingers broken. On Sunday he resolved that his next half day would be devoted to his home and garden. But on Monday, when two old friends called and sympathized with him and expressed the

HE SHIPS THE DOGS

belief that his fingers would get into active shape in a day or two, and incidentally mentioned a catboat trip which they wanted him to join on the next Saturday. He fell into their scheme with alacrity. To be sure, he knew little or nothing about boats, and said so. But they laughed at that. No old sport, they said, had gone through so many years of life with out lubbing some experience of boats. They chose to think that he was joking with them. "You'll show us," said they, "how a catboat ought to be sailed, and we shall appear lubbers beside you. Don't tell us you are a green boatman. We can't swallow that."

By this time our man hoped that he was something of a sailor. In fact, he felt that he was a sailor, and he was not long in reaching the conclusion that his friends were going to be indebted to him for life after Saturday had come and gone. He could foresee several perilous situations which he was to rescue them from.

He promised to bring his share of supplies, and after the meeting-place was arranged the two men went away. Saturday noon came. With it came a good high wind. Our man should have been scared. He had never sailed in a high wind in his life. Anyway, he started off with a basketful of the most unlikely food a sailor ever used. He had canned salmon, and nothing to open the can with. He had doughnuts and mixed pickles and club sandwiches and a bag of peanuts. Of course he had some wholesome food, but not enough to strike a balance against the other stuff. He dumped all these things into the locker and got ready for work.

Having been shod in a fine new pair of russet shoes, which in appearance did not fit his old suit of clothes, he proceeded to take them off, so that he could, barefoot, be free to slop about as he pleased. He also changed his hat, a derby, for a straw hat of the kind dealt out by the bath houses at seashore resorts. He tied it under his chin, so that it could not get away, unless his head went with it.

They pushed off, and his companions asked him to "ship" the rudder. Now, our man had never "shipped" a rudder, but he had an idea of what was wanted, so he sat down on the edge of the stern, and with his legs hanging over, tried to slip the pins on the steering gear into the small rings provided for them. With the boat rocking this was no easy task, and neither

BE CALMED

one promptly came out of its place, and the work had to be started all over again. Just as our man thought he was about to get both rings in position the boat gave a lurch and he promptly fell overboard carrying the rudder with him.

"You know a lot about shipping rudders," said the skipper sarcastically, while our man spluttered and struggled in the briny. "You ship one just as you would a package of sardines. Did you telephone to the mermaids that that rudder was going to be sent to them, and have you addressed it all right? Why don't you throw the boat overboard while you are about it? We don't want it now. What's the good of the old boat without a rudder, anyhow? I thought you were a sailor!"

Then they fished him out with a boat-hook and pulled in the rudder. Then the skipper and the rudder leaned over the stern. The skipper gave one quick push and the rudder fell into place.

They told our man to get dry and hold the rudder straight. So, between

Merit

Made and Merit Maintains the confidence of the people in Hood's Sarsaparilla. It's a medicine cures you when sick; it makes wonderful cures everywhere, then beyond all question that medicine possesses merit.

Made

That is just the truth about Hood's Sarsaparilla. We know it possesses merit because it cures, not once or twice or a hundred times, but in thousands and thousands of cases. We know it cures, absolutely, permanently, when all others fail to do any good whatever. We repeat

Hood's Sarsaparilla

Is the best—in fact the One True Blood Purifier.

cure nausea, indigestion, biliousness. 25 cents.

Hood's Pills

GEORGIE.

Pa's Adventure With a Gentle Horse Which He Bought for Ma.

deer editur—pa has not been 2 work this week.

laist week ma & lil was talkin & they sed because the nice wether was comin we o ter haiv a hoss, an pa sed at nite we wood get 1, we want a nice gentil hoss wat we kin drive sed ma.

al rite, i wil get 1, sed pa. so on saturday nite pa brot home the boss, an on saturday mornin we al went out 2 look at him.

the boss loked at us out uve the corner ov his eyes, an ma sed she didnt think he was very gentil, he lukes ferocious, sed ma.

we, sed pa, i gess i no a hoss wen i see 1, an i say hese gentil, so that settles it.

he lukes like a runaway, sed ma.

i will hitch him up an drive him a round the bak yard and let u see him, sed pa.

so he got out the lite wagon and brot the hoss-up 2 it.

does he kik, sed lil.

how many times did i tell u he was a gentil hoss, sed pa, of corse he dont kik, the hoss must have node wat pa sed, 4 rite away he commenced to kik and pa cood hardli harness him up.

pa sed it must be a fil botherin him, but ma sed she gessed thay wasent mani flies around in march.

then wen u got the hoss harnessd up he got in the carige an sed git up, but the hoss woodnot move.

ho, hese a orful nice gentil hoss, he is, sed ma, u no al about hosses dont u, yuve just gone an throdde moni away.

ma commenced 2 cri.

u wood spile any hoss, sed pa, yuve been talkin so much he is skart.

u lie, Josier, sed ma, u lie, u no i havent sed 3 words, and i dont believe that hoss wood here any way, i believe hose deff, dum, blind and halt, u r a ole fool, an he nose it, and i dont believe he wil ever go 4 u.

pa al the time was hitin the hoss with his whip an tricn 2 mak it go, but it woodnot, an he was orful mad.

fil an me was laffin at him.

i no wat wil maik him go, sed pa, i wil blow in his ear.

pa stund up in the wagin and leaned over on the hoss, so he cood blow in his ear, an as soon as pa stund up the hoss give 1 jump, an pa set down in the bottom of the wagin, and the way that hoss b havend was just shaimful, he stund up on his hind laigs and tride 2 stand on his head, an he run over mars flowers wat was standin in the sun, and he run out the gait an down tord the village, an pa al the time holdin on 2 the sides ov the wagin, so he woodnt fall out.

ho, it was grait.

pa was brot home in about 2 hours an a shutter, the boss was cort in a drug store, the wagin hasent been found, pa wil haiv 2 pay the drugstiz 100 dollars.

ma ses shes sorri 4 pa, but he dont no nothin about hosses.

pa ses the hoss is gentil enuff, onli he got a littil scited.

a man tride 2 ride him in the saint patriks payraid yesterday, thay tut him 2 a hospital.

GEORGIE.

Among the Animals.

"I fear, said the elephant, "that the alligator is a little of a blackmailer."

has proved so popular with his young lady readers, who can see how everything turned out in the book without taking the trouble to hunt it up in the end, that he has been offered \$25,000 for his next book."

An Awful Shock.

"If you knew who I was," said the tattered young man with dignity to the citizen he was importuning for a dime, "you'd be glad enough to give me the money."

"Well, who are you, anyway?"

The tramp drew himself up with an important air.

"I'm Charlie Ross, de kidnapped child!"

The other walked on.

"You can't give me any story like that. It isn't worth ten cents."

"It's true, so help me!"

The citizen turned suddenly and asked:

"How old are you?"

"I'm twenty, boss," said the tramp, quickly. He didn't look it, but that was probably immaterial.

"Well, now I know you're a liar!" said the other, "for Charlie Ross was stolen in 1874, and he was four years old then, so if he were alive now he'd be twenty-seven years of age. Good day."

"Hold on, pard," said the tattered one; "dat's all right. It's true what I was tellin' yer. I oughter be twenty-seven now, but I'm only twenty, cos when I was kidnapped it scared me outer seven years' growth, see?"

The citizen seemed to think that that was worth the dime, for he gave it.

THE AWAKENING OF SUMMER.

"MAKE HER A LITTLE SHARPER, SIR."

Roasted.

She spoke bitterly.

"You don't appreciate the sacrifices I make for you!"

He was inclined to be sarcastical.

"What sacrifices?" he demanded.

In answer she tossed her head.

He repeated the question sneeringly.

"What sacrifices?"

She was bound to reply, but her tone was that of the injured in feelings.

"Well, isn't it enough that I never get a girl, and always cook the dinner myself? Isn't it enough that I cooked the dinner myself to-night? And yet you have the face to ask what sacrifices?"

He sneered again, this flinty-hearted man. He laughed a hard and harsh "ha!"

"Sacrifices, is it? Well, it's a burnt sacrifice at all events!"

So saying he savagely stuck his fork into the steak that had been broiled not wisely but too well, while she sobbed to beat the band.

We hear a great deal about purifying the blood. The way to purify it is to enrich it. Blood is not a simple fluid like water. It is made up of minute bodies and when these are deficient, the blood lacks the life-giving principle. Scott's Emulsion is not a mere blood purifier. It actually increases the number of the red corpuscles in the blood and changes unhealthy action into health.

If you want to learn more of it we have a book, which tells the story in simple words.

SCOTT & BOWNE, Belleville, Ont.

UP-TO-DATE SUMMER GIRL OF 1897.

test model has a cluster of seven quarter-inch tucks running horizontally on either side of the waist from the shoulder to the belt and extending right to the arm hole.

The cuffs are four inches deep and formed entirely of tucks. There is no space between any of this tucking, the tucks being laid as close to one another as possible.

The collar and collarette are now the shirt waist's crowning touch of glory, and of collarettes there are endless and fascinating varieties. The linen collar plays a decidedly second part and has dwindled into a mere narrow white line worn high and close about the throat and swathed in a stock that ties in a butterfly bow with pointed ends.

These stocks should invariably be black, unless fashioned of the same material as the shirt waist.

Collarettes are made to fasten invisibly in the back, and are fashioned of mousseline de sole, of plaited chiffon, of wash blonde edged with thread lace, or are covered merely with soft folds of black or white tulle with a big, fluffy bow of this airy fabric tied under the chin. The magic touch of any one of these dainty arrangements for the throat will transform the most prosaic shirt waist into a garment fit to adorn almost any summer function.

The most chic trimmings used on sailor hats are wings and quills. Many of them are smothered in flowers and tulle. With the perfectly plain shirt waists perfectly plain sailor hats are still worn. They vary little from those of last season in their lines, except the crown is a trifle higher and the brim not so wide. A sailor hat of white Panama straw with a high bell-shaped crown, trimmed with a twist of black velvet ribbon ending in a bow of long loops on the side, from the centre of which rises two lace, broad black quills, is very good style. But the smartest sailor has a straight crown of medium height, is decidedly oval in shape, being quite shire in the back. There are folds of moire about the crown, and on one side and well toward the front are a succession of long wings.

The summer girl must have a parasol to harmonize with every toilette. She will tolerate nothing that is not distinctly bell shape, with long, sharply curved ribs. Accordian plaited sunburst parasols she scorns with all the other eccentricities of their ilk.

Everyday Hosiery and Cycling Footwear.

In hosiery one sees some wonderfully dainty stockings. The spun silks are made with embroidered fronts in various colors, while very pretty stockings in black sun silk may be obtained embroidered with rosebuds in pale shades of pink, yellow and green. The stockings with the shaded vertical stripes, embroidered on a black background, are very effective, and the same must be said of the Lisle thread with black feet and ankles, and with tops either in pink, pale blue, cardinal or white. Among the other novelties in Lisle thread stockings, I must mention those with a drop stitch stripe. The plaid stockings (which are illustrated) are obtainable in various bright colorings. For useful everyday wear in the summer, nothing can possibly be nicer than the spun silk, which are procurable in various colors.

We wish to call the attention of all

PLAID STOCKING. CYCLING SHOE.

ardent cyclists, continues Madame, to the new cycling shoe. It can be had in black glaze or tan leather. This shoe is made with a pure rubber sole, which is of almost endless wear. It is light and cool, gives beautifully to the foot, yet fits closely while allowing perfect freedom when pedaling. As will be seen in the sketch, it is finished with a neat little steel ornament just above the vamp. Another favorite cycling shoe is fitted with a flexible rubber waist and corrugated sole. It is after the style of the Oxford shape, with a strap across the instep. Always useful are the Oxford shoes in tan or box calf, and these are equally smart for walking or cycling, being finished with the Louis XV. shaped heel.

hold the rudder straight. So, between musing on his wetness and silently praising his foresight in removing the row russet shoes, he let the boat jibe, and the boom swung around and hit him on the head and knocked him overboard. So they fished him out once more and told him to get dry all over again. By this time the water was

A KNOCK OUT

coming into the boat through various orifices in the bottom and sides. These orifices were invisible, but their visible results made quite a barful of water. Now our man had a little of the best of it. The others had shoes on and stockings, too. They were soaked through, and our man had a quiet laugh. He didn't like to say much, but they read his face and promptly gave him the hardest end of the bailing job. He succeeded in losing his tin pan overboard, and then he started to bail with his straw hat. Of course the bigger part of the water came back into the boat and a good part of it soaked into his clothes. There was no time now to be told off to get dry, so our man put the best face he could on the matter, and it wasn't a very good face at that.

Before the boat was properly rid of the unwelcome water a heavy breeze came along and lifted the boat with a bounce. All hands sprang to their posts. Our man's post was one of the sheets. They didn't "sheet," because by this time all hands knew that our man didn't know a sheet from a hand saw. So they just told him what rope to grab. Then another fellow grabbed another rope, and as the skipper had told our man to "hang-on," he hung on. The rope the other men grabbed had some mysterious connection with our man's rope, so when it was pulled our man went right up to the masthead. The others didn't know it at the time, and they figured the sheet to a cleat. About this time the boat heeled over and our man slid down his rope in time to hit the water with a good dull thud. The others were in various positions of peril, and all three waited for help at the top of their voices. Then a tugboat came along and fished them all out, and our man went home with a four times wetting. The boat sank with a sigh of satisfaction, and all was over except the three severe colics which had just gotten under way. Of course, the skipper blamed everything on our man. That is his fate. Every time anything happens he is the scapegoat. He is used to it, but he comes up smiling for new events and catastrophes.

The Summer Shirt.

Finally the fashions became so pronounced that the wife of Hercules laid out the shirt of Nessus for her husband to wear.

"It's no hotter," she argued "than the average haberdashery you see at the resorts these days."

Moreover, as events proved, whoever wore that particular garment was pretty nearly dressed to kill.—Detroit Journal.

20 bars of soap for 25c. at Shannon's grocery.

Try the celebrated high mix corn. For sale by C. L. Shannon.

F. O. Myers, Kingston, has made his eighth century run this season.

Paris green, paint oil, white lead, window screening. New line pocket cutlery, cheap at Boyle & Son.

The Canadian team at Bisley are doing good work. Their scores in all matches in which they have competed so far have been high.

The way the old boomerang Tories blab and prate about Sir Wilfred Laurier receiving honors is sickening. What about the late Sir John Thompson when he was in England?

It is reported at Washington that in the case of interference on the part of Japan, the United States will land mariners on the Hawaiian Islands and hoist the American flag.

On Saturday last Sir Wilfred Laurier and other colonial premiers visited Mr. and Mrs. Gladstone at Hawarden. They were much impressed with the Grand Old Man's mental alertness and physical vigor.

C. L. Shannon has on hand a full stock of millet and Hungarian; also four kinds of English corn. Try the celebrated high mix. Baled hay for sale.

George Free, hostler, Bradford, Ont., dragged a young girl nine years of age into the bush and assaulted her. When she recovered consciousness the child told her pitiable tale. A search party are after the sounder.

The citizens of Toronto, on Wednesday evening last, gave the members of the 48th Highlanders, who were in England, and carried off such high honors at the tournament at Islington, a very warm reception on their return home.

Go to R. Lawson's meat market for prime fresh beef, pork, veal, lamb and all kinds of salted meat. Home-made sausage and all kinds of poultry in season, fine sugar cured hams and English breakfast bacon, always on hand. Prices to suit the times. 22tf

The situation in Cleveland, Ohio, over the coal strike is becoming desperate. The Cleveland railroads are growing bolder in confiscating coal, and those who depend upon a regular supply are becoming anxious. Several boats have been delayed owing to the difficulty in securing fuel.

Habit is a queer thing. An old gentleman in Monteville, Me., who said he could not see to sign his name until given a pair of glasses, was given a pair from which the lens had been removed. He signed the paper nicely and declared that he could see better with those glasses than any other he had tried.

The Toronto World says that the Toronto police force seems to be in need of its decennial reorganization. It is said to be becoming moss-grown and rotten with internal dissensions and red-tapeism or militarism. A desperado broke jail on Monday and it now transpires that a crowbar had been left within reach of the prisoner.

Hamilton Armstrong the leading grocer, the place to buy your sugars. I am selling large quantities of sugar because quality and price are right. Groceries of all kinds, of best quality, and lowest prices. A large stock of fruit jars on hand, all sizes, at away down prices. My flour trade is increasing daily, because you can always depend on getting a good article at bottom prices. I am selling a Japan tea at 25 cents that takes the cake every time. Remember the house. Campbell House Block.

Harry Wilder, of Kingston, had a narrow escape from serious injury one day last week. He was wheeling out the York road, and when near Westbrook tollgate, saw a runaway team coming. He kept well on the right hand side of the road, the horses being on the opposite side. Just as they neared him the animals swerved to the right side of the road, the rear wheel of the rig striking Mr. Wilder's bicycle. The rider was tossed into the ditch, his wheel being thrown on top of him. Beyond a few scratches and a general shaking up he was uninjured. One side of his face is skinned where it came in contact with the gravel. Strange to say his bicycle also escaped injury.

Situation Wanted.

A stenographer, experienced and competent. Address box 622, Nanapanee. 29ap

Dry Mill Wood.

Over 1000 cords. \$1.60 per cord. THE RATHBUN CO., Nanapanee.

Wanted.

Men and Women who can work hard

Skipped Out With The Money.

Geo. Booth, of Trenton, who held all the money in connection with the races in that place last week, has skipped out, taking between \$2,000 and \$3,000 with him. Many of the prizes were not paid, and the horsemen lodged a complaint against Booth. Telegrams have been sent in all directions to look out for him.

San Jose Scale.

We have received this week a copy of the bulletin on the San Jose Scale, which is playing havoc on fruit and other trees. The pamphlet is issued by the Ontario Department of Agriculture and contains much useful information regarding this new enemy of fruit and foliage for not only does it attack fruit trees but also ornamental shrubs. The bulletin can be secured by applying to the Department of Agriculture, Toronto.

A Quiet Wedding.

On Thursday of last week, Mr. G. W. Waggott, the new proprietor of the Campbell house, was married to Miss Alzina McKibbin, the only daughter of Mr. D. D. McKibbin, Milford. The ceremony was performed at St. Mary Magdalene's church, Picton. Rev. Rural Dean Loucks officiating. Only a few of the nearest relatives and friends being present. After the ceremony the newly married couple left by the afternoon boat for Nanapanee. The bride and groom have our hearty congratulations coupled with best wishes for a happy and prosperous life.

A Big Leaf.

On Thursday we were favored by a call from Mr. M. W. Simpkins, the live sewing machine man, who is known throughout this section. He laid on our table the largest basewood leaf we have ever seen, which he secured in the township of Portland, Addington. The leaf measures 3ft. 7in. in circumference, 14 inches in length and 12 1/2 inches in width. He has the best sewing machines in the world for \$36.00. Who will be the next to secure one of his beautiful sewing machines. Address, M. W. SIMPKINS, Newburgh, Ont.

Orange Excursion.

On Monday last the Orangemen of Nanapanee and the neighboring section held an excursion to Watertown where they participated in a monster demonstration at that place. They went by train to Kingston, leaving here at 6.30. A large number of people were picked up along the line. At Kingston they boarded the steamer Star, Lawrence to Cape Vincent where a train was in waiting to convey them to Watertown. The excursion was accompanied by the Citizen's Band, and we are glad to say that the boys acquitted themselves in a most creditable manner. The music furnished by the band was favorably commented upon.

Fire.

On Tuesday evening last, shortly after 5 o'clock, an alarm of fire was sounded from box No. 6. The firemen promptly responded and when they reached the scene found a barn in the rear of Jehiel Aylsworth's house, on Donald street, to be on fire. The flames had gained considerable headway before being discovered, and the building was ablaze before the brigade arrived. A stream of water was soon put on and before many minutes elapsed the blaze extinguished. The supposition is that the place was set on fire. We must congratulate the brigade on their rapid work. We have a fire brigade that cannot be equalled in many cities.

Narrow Escape.

On Friday evening last, little Helena Edwards, daughter of Mr. Evan J. Edwards, Division Court Clerk at Deseronto, had a narrow escape from drowning. While the family were at tea they heard a splash in the direction of the back door, but they thought nothing of it for a few moments. Going to the door they found the little one coming in all dripping wet. It appears she had climbed on a box to dip out some water from a tank, with a cup and tumbled headlong in, but in turning over came to the top, to which she clung and managed to clamber out without assistance. She was none the worse for her thrilling experience.

Camp Le Nid.

The Camp of 1897 promises to be the largest in the history of the organization. The following have answered to the roll call so far:—G. W. Morden, Jas. McDonall, Picton; James Miln, F. H. McDonald, James Day, J. D. Warde, Samuel Cork, E. Y. Parker, W. Brisbin, C. G. McClelland, Toronto; Wm. Mavnard, H. Dick.

THE YACHT RACES.

SLOW TIME OWING TO LIGHT BREEZE.

They Were Well Attended—The Reindeer Took a Good Crowd.

On Friday afternoon last the second of the series of yacht races under the auspices of the Nanapanee yacht club was held on the bay opposite Deseronto. The Str. Reindeer left Nanapanee at 1 o'clock, with a large party on board. She also towed the entire fleet to the course. The day was scorching hot and there was not much breeze. The boat reached Forester Island shortly after 2 o'clock when the first gun was fired. The course was triangular the starting buoy being up the bay of the pavilion at the island, the second buoy off Fredericksburgh shore and the third buoy off Ungar's Island.

Ungar's Island.

Deseronto.

Fredericksburgh.

Forester Park.

By an arrangement made previous to the race the Dauntless was to give the other boats an advantage, the terms of which were that if there was a reefing breeze the Dauntless was to go three times around the course to twice of the other boats, besides the time allowance. The start was made at 2.48. The Dauntless was the first to cross the line followed by the Madge, Orpha and Petrel, the Satisfaction coming soon after. The Skip Jack and Star unfortunately did not watch their time and were some distance from the flag when the gun was fired. The Dauntless at the firing of the gun put out her spinnaker and catching the breeze shot ahead. The Madge Orpha and Petrel followed suit and kept well together on the first leg. They did not seem to head the buoys very well and held up the bay. The Madge rounded the buoy first, followed close by the Orpha and Petrel. Satisfaction had the breeze she required and after rounding the buoy closed the gap between the Petrel and when almost half the second leg was covered, overhauled and passed her. The Skip Jack passed the Star on the first leg and kept in that place to the finish. It was of course a foregone conclusion that the Dauntless would hold her lead throughout and therefore the interest centered in the Madge, Orpha, Petrel and Satisfaction, between whom there was a good race. The Madge rounded the third buoy first and headed down the bay on tack. The Orpha followed in her course but did not go as far down—only half the distance when she came about for the starting buoy. In this move she seemed to get the lead on the Madge and rounded the buoy first. At this point the Satisfaction and Petrel were fighting for supremacy, but the wind was with the Satisfaction and having made a shorter tack than the Petrel, stood for the starting buoy which she rounded first; she was however closely followed by the Petrel and was not much in the lead when the start was made on the second round of the course. The Madge and Orpha at this time were well toward the Fredericksburgh shore and each headed better for the buoy than on the first round. The Orpha rounded first followed about half a minute by the Madge. The Satisfaction and Petrel were running almost even, each with spinnaker set. The spinnaker of the Satisfaction seemed to be too light and would not hold place with the wind. Skipper Carson in his anxiety to hold it down sat upon the boom when it broke. Not to be outdone a pikepole was brought into service. In this she lost a little time, but when everything was put to rights she again took the lead which she held to the third buoy. The Madge and Orpha were having an even contest on the second leg and at times ran even. One advantage the Orpha had over the Madge was her topsail for when the Madge was to the windward of the Orpha the latter craft would have been blanketed had not the topsail of the Orpha caught what breeze she could get. The Madge rounded

Kingston will have a new drill shed. It will be erected on government property on Montreal street.

The long looked for rain came on Sunday evening and the farmers of this section are wearing a pleasant smile.

Particulars free.

THE BRADLEY-GARRETTSON CO., L^{td}, Toronto, Ont.

The mystery connected with the kidnapping of "Charlie Ross" has been revealed. Sixteen years ago workmen were engaged in tearing out a basement at New York where they found the skeleton of a boy. Gilbert Mosher told his son William that this was all that remained of the body of Charlie Ross, who was murdered in the house. William has a son Ellsworth, who lives in New York. He has revealed the mystery of the fate of the long lost boy.

A dredge while at work near Capt. Reid's dock, Sacketts Harbor, on Friday last brought to the surface an old cannon, which was safely landed upon the deck of one of the mud scows. Upon examination it proved to be of very ancient design, about five feet in length and twenty inches butt, and sixteen inches at the nozzle, with nine inch bore reimbursed with iron bands or rings, and weighing about 1,500 pounds. There seems to be no doubt that this gun was captured by the Americans from the British at Little York, now Toronto, during the war of 1812, and it is a very valuable relic of that war.

A Sad Death.

About two months ago Miss Cora Clancy, Centreville, went across to Boonville, Oneida County, N. Y., to visit her aunt, and expecting to soon return home again. On Friday July 2nd, she was stricken with paralysis, and so severe was the shock that she died that same evening. She was aged only twenty-eight years, and was popular with a wide circle of friends, who deeply mourn her sudden demise. The remains were taken by her father to Centreville for interment.

Fall in Line.

Take your place in the procession going to Smith's to have their eyes examined by the expert optician. Taking chances with your eyesight is downright recklessness. Nearly all who suffer from headaches are guaranteed relief by wearing Smith's correctly fitted spectacles. Present neglect means greater eye troubles in old age. H. E. Smith is a graduate of the New York Optical College, and student of Dr. Knowles, New York City. He has had years of experience and will guarantee satisfaction to all. Office, SMITH'S JEWELLERY STORE.

Died on the Track.

At the Trenton races, last week the horse Dyksie, owned by S. Harkness, of Kingston, dropped dead on the track. The first heat of the 2:20 pacing race was being contested. Dyksie drew eighth place among eight starters, and when a point 150 yards from the winning post had been reached, he had fought his way to second place. At this point his jockey, Fred Metcalfe, heard a deep groan from the horse and felt him shiver in his harness. Divining that all was not right with the animal, Fred drew rein and slackened Dyksie's speed. He held second place, however, until he passed under the wire, when he dropped in his tracks, and in two minutes was dead. A veterinary surgeon who was on the ground gave it as his opinion, after an examination of the horse, that his death was caused by the excessive heat. Dyksie was six years old and had a record of 2:20 1/4. Mr. Harkness valued him at \$500. Dyksie, to all appearances, was in the best of health and spirits when he was led for the first heat, and frisked and played with his jockey as he was being led to the hitching-up point. Dyksie was well known here as he figured very prominently at the races on July 1st.

Again Destroyed by Fire.

About three o'clock Saturday morning last the general store of Neilson & Co., Conway, was discovered to be on fire. Every effort was made to arrest the progress of the fire, but the fire-fighting appliances being inadequate, the efforts of the people proved no avail. The store with its contents was entirely destroyed. There was insurance to the amount of \$700 on the store, and \$500 on the stock. There was over \$1,000 worth of stock in the store at the time. A year ago last 24th May, Neilson & Co., sustained serious loss in the destruction of their store, which was struck by lightning and was burned to the ground. A new edifice was erected, and opened only about two months ago. The stock it contained was new. The drive shed of W. Wright, which adjoined the general store, together with rigs and harness, was also consumed by the fire Saturday morning last. It was close to the building in which the flames broke out and so was doomed from the beginning. The residence of Mr. Wright narrowly escaped destruction. Just how the fire started is not known, as every precaution was taken to prevent such disaster. It is likely another store will replace the one burned.

Stratford; J. W. McElroy, Ottawa; W. R. Silks, Mount Forest; A. C. Gould, Oshawa; E. R. L. Gould, Jas. Ingram, C. G. Morgan, Sidney Morgan, Hurst Purnell, John Hurst, Charles Hurst, Jas. Winches ter, W. Mariott, Baltimore Md.; W. S. Herrington, Morley Wilson, M. B. McDon ald, and T. E. Anderson, Napanee. The first contingent leaves Napanee on Saturday July 17th and others will follow from time to time. The Steam Yacht "Jessie Forward" will do service for the party this season, and all are looking forward for a jolly time.

Evil for Good.

On Monday night last a stabbing affair took place at Centreville, and the victim now lies in a precarious condition. Mr. Wm. Finland, who lives with John Lockridge, was in the village attending the Orange demonstration. He appears to have partaken of too much liquor, and on his way home became tired and laid down to sleep. Mr. David Cameron, when on his way home, found him. He aroused him and asking him where he wished to be taken, was told to take him to Mr. Lockridge's. Mr. Cameron took him to the house and upon arriving there Finland accused him of taking from his pocket a bottle of whiskey. Cameron said he did not take it, and opened his coat to allow Finland to search him. While Cameron had his coat held open with both hands engaged Finland stabbed him on the right side, just below the lung. Medical aid was summoned and Cameron is now lying in a precarious condition, it not being yet known what the result will be. Constable Huff went out and arrested Finland on Tuesday morning, and upon receiving a preliminary hearing was remanded to jail for eight days in order to see what would be the result of the wound inflicted on the man who was assaulted while doing an act of kindness.

Lawn Tennis.

On Saturday afternoon last the Napanee Lawn Tennis Club held a local tournament, which in every way was most satisfactory. Refreshments were served by the ladies after the first round, after which play was resumed. Owing to the limited time, at the disposal of the players the game was limited to two sets, the winners of the most games to be proclaimed the victors in round. The ladies drew for partners. The following is the result.

FIRST ROUND, MIXED DOUBLES.

W. Prun and Miss Templeton beat W. Green and Miss Harshaw 6-3, 4-6.
F. Huffman and Miss Ward, beat E. Grange and Miss M. Ward, 6-2, 3-6, 6-3.
E. Hall and Mrs. Baines beat B. Harshaw and Miss T. Harshaw 6-1, 6-4.
Mr. McCulloch and Miss Kobb beat W. Rockwell and Miss Checkley 6-1, 6-2.
Messrs. Parker and Checkley beat W. Ponton and Miss S. Harshaw 6-4, 5-6.
B. Harshaw and Mrs. Baines beat W. Smith and Miss Grange 6-1.
B. Harshaw and Miss B. Grange beat W. Smith and Miss Grange 6-0, 5-6.

SECOND ROUND, MIXED DOUBLES.

Mr. McCulloch and Miss Kobb beat W. Prun and Miss Templeton 6-2.
F. Huffman and Miss Ward beat W. Hall and Mrs. Baines 6-2.
Mr. McCulloch and Miss Kobb beat Mr. Parker and Miss Harshaw 6-3.
Mr. Ponton and Miss S. Harshaw beat F. Huffman and Miss Ward 6-5.

GENTS. DOUBLES.

McCulloch and Parker beat Ponton and Durand 6-3, 3-6, 9-7.

LADIES DOUBLES.

Miss Ward and Miss Harshaw beat Miss M. Ward and Miss Templeton 5-3.
Miss B. Grange and Miss Harshaw drew with Miss Kobb and Miss Templeton 3-3.

The hardware merchants are now in it. They close on Friday afternoons during July and August.

Prince Edward Island Provincial nominations took place Wednesday. There is a contest in every riding.

There is a deadlock between the American House of Representatives and the Senate on the tariff bill.

Lieutenant Governor Kirkpatrick is in a very poor state of health. Early in the week there were little hopes of his recovery.

E. G. Scott, Quebec; M. J. Butler, Napanee; F. G. B. Allan, Napanee Mills; R. C. Carter, Kingston; S. Rathbun, Deseronto, and James N. Greenhields, Montreal, are applying for incorporation as the St. Lawrence Portland Cement Co., with a capital of \$25,000.

Fans of all Kinds at Pollard's.

the buoy first followed close by the Orpha. The Satisfaction and Petrel were not far behind, and when on the home stretch the four crafts were about even. On this run the breeze seemed to change and the boats had to sail close. The Madge, however, came well down the bay, followed by the Orpha. The latter craft did not make as long a tack as the Madge and again gained an advantage, rounding the buoy a few minutes ahead. The interest was now centred between the Satisfaction and Petrel. The former craft was in the lead owing to a short tack and rounded the buoy first. When the Orpha rounded the buoy at the finish the Dauntless was almost at the third buoy on the third round. She did not fill her agreement and thereby lost the race. The following table shows the winner of the race and the time of each.

	Start.	Finish.	Act.	Cor.
* Dauntless	2.48	4.35.45	1.35.45	1.35.45
5 Madge	2.48	4.55.15	1.57.15	1.51.06
2 Orpha	2.48	4.51.30	1.53.30	1.46.45
3 Petrel	2.48	4.58.15	2.00.15	1.47.03
1 Satisfaction	2.48	4.56.15	1.58.15	1.44.45
4 Skip Jack	2.48	5.09.30	2.11.30	1.48.51

*Ruled out—fouled buoy.
Messrs. S. C. Warner and J. L. Boyes were the judges.

NOTES.

When the race was completed many of the crew on the yachts enjoyed a good swim.

The sport was enjoyed by those on the Reindeer.

The race would have been much more interesting had there been a stiff breeze blowing.

The steam yachts Dorothy and Jessie Forward took a party down to see the sport.

It is expected that the next race will be held one week from to-day.

We are still successfully fitting the most difficult eyes possible to apply glasses to. Advance diplomas from two optical schools. A graduate of W. E. Hamill, M. D., a specialist in all eye diseases, and also of Lionel Lawrence, late of Toronto, now principal of a large optical school in London, England. A. F. Chinneck, at F. Chinneck's jewellery store.

The financial statement which appears in the official Gazette in every way very satisfactory. The revenue of the year ending 30th June last, shows an increase of about a million and a quarter over that of last year, while there is a nominal surplus on consolidated revenue, of \$5,500,000 but as all the items of expenditure are not included, this will be greatly reduced. At any rate there is likely to be a small surplus for the year, a better showing than was predicted by Mr. Fielding.

BOARD OF EDUCATION.

A meeting of the Board of Education was held on Monday evening.

PERSONALS.

The family of the Rev. S. J. Shorey, Peterboro, will take up their residence at Sturgeon Point next week, and will remain about a month.

W. D. Madden had his flag flying on Monday last in honor of the day.

Hood's Pills are the best family cathar.

Church of England Notes.

PARISH OF ADOLPHUSTOWN—Services next

Present, H. M. Deroche, chairman; Messrs. Cowan, Coates, Hanley, Grange, Templeton, Herrington, Ashley, Preston, Wright, Henry, Boyes.

Minutes of last session read and confirmed.

A communication was read from Mr. F. C. Anderson applying for position as teacher of Senior IV at Model School for the term of 1897 at a salary of \$200 per term. Referred to committee on teachers to report.

A communication from Miss Maggie O'Brien enclosing a testimonial from the school section where she has been teaching was read.

A communication from Mr. F. Burrows, school inspector, recommending the appointment of Miss Hypatia Fox as primary teacher at the model school, was read.

The report of the committee on teachers which was laid over from last session was taken up. The second clause in the report recommending the dismissal of Mr. A. G. Wilson, science master, on the ground that pupils are finding fault with his teaching.

Mr. Herrington made a strong plea in behalf of Mr. Wilson, not for any personal friendship for Mr. Wilson, because he has spoken to him but twice since he came to town, but in the interest of justice and fair dealing. The only ground the board had for their action towards Mr. Wilson were the complaints of a few pupils. If the board were to listen to the complaints of pupils against teachers, and act upon them, they would soon dismiss nearly all the teachers on the staff. He moved, seconded by Mr. Hanley, in amendment, that Mr. Wilson be re-engaged at the same salary as last year.

Mr. Deroche said that one of the teachers of the Institute told him that if Mr. Wilson was dismissed on the complaint of pupils, he would consider it time for him to look out for another position.

Mr. Preston said that every member of the committee were satisfied with the report as presented. He said that Mr. Wilson had been engaged for a certain purpose, and if he was not competent to fill the position then he should be discharged. This board, in the interest of the school must have an efficient teacher for the science department.

Mr. Herrington amendment was put and carried on a division of 8 to 3.

Mr. Herrington reported verbally that the ladies to whom the kindergarten furniture had been loaned had given him notice that they were through with it. He recommended that the property be removed from the present premises and placed in the West Ward School.

The Finance Committee presented the following estimates for 1897-98.

PUBLIC SCHOOLS.		
	1896-97	1897-98.
Expenditure	\$5,420.00	\$5,320.00
Income	795.00	750.00
Required from town...	\$4,625.00	\$4,570.00

HIGH SCHOOL.		
Expenditures	\$7,060.00	\$6,810.00
Income	4,210.00	4,200.00
	\$2,850.00	\$2,610.00

Moved by Mr. Herrington, seconded by Mr. Preston, that Miss Hypatia Fox be engaged as primary teacher at the model school in place of Miss Aylsworth, resigned. Lost.

Moved by Mr. Cowan, seconded by Mr. Henry that the matter be referred to the committee on teachers. Lost.

Moved by Mr. Hanley, seconded by Mr. Henry that Miss O'Brien be appointed to the vacancy. Lost.

Moved by Mr. Preston, seconded by Mr. Herrington that the matter be laid over till next session. Carried on division of 8 to 3 days.

Moved by Mr. Wright, seconded by Mr. Henry that the chairman and secretary be instructed to present the estimates to the town and county councils. Carried.

Accounts from J. G. Fennell amounting to \$8.21 were presented and referred to committees with power to act.

Board adjourned.

At Close's Mills grinding is done Tuesday and Thursday forenoons only. Customers should be in early as steam is shut off when custom work is caught up with.

Capt. Bloomfield, of the Str. Hero, has hosts of friends, everybody knows that. The other evening a breakfast and dinner set of china and a mantel piece ornament in silver were presented to him amid the enthusiastic plaudits of the crowds of friends of his on the boat, whose deck he trends with such

A Summer Specific. Dr. Fowler's Extract of Wild Strawberry cures cholera, cholera morbus, dysentery, dysentery, cramps, colic, summer complaint, canker of the mouth, and all bowel complaints of children or adults. It is a soothing, effectual and never failing medicine, which gives immediate relief and peculiarly effects a cure.

On Friday last while Mr. Peter Bristol was picking cherries at the residence of Mrs. Forward, the limb of the tree against which the ladder was braced, broke, throwing him to the ground a distance of about seven feet. He was badly shaken up but we are pleased to say was not seriously injured.

We would recommend that a signal box to show the box from which the alarm has been sent be placed in the fire hall. With this the firemen could see on their arrival at the hall where the alarm comes from and not have to wait until it is struck on the bell. Much valuable time might be saved by this.

Whenever the train with the Canadian delegates enroute to the Christian Endeavor Convention at San Francisco stopped at a station on the way, the entire party, led by a lady from Ottawa, joined in singing the "Maple Leaf" and "God Save the Queen," at the same time waving the Union Jack and Canadian flags.

Messrs. J. Waters and Bros' dry-goods store, Campbellford, was entered by burglars Sunday night or Monday morning. The burglars obtained an entrance from the trap door outside into the cellar. The door of the safe was blown open, and the books, papers, etc. scattered about the office floor. No money was obtained, and nothing of value is missing.

Word comes from Mexico of the discovery of a cheap and safe hypnotic in the common white zapote seed. It is said to produce a tranquil sleep, leaving no unpleasant after effects and producing no appetite for the drug. It is hailed as a boon to medical men who treat the insane, while it will probably be of great use in the average physician's practice.

Excursion to Montreal August 11th Napanee Lodge I.O.O.F., No. 86, will run their 18th annual excursion on the above date via G.T.R. leaving Napanee 7.30 a.m. arriving Montreal 1 p.m. Tickets good 4 days. Fare for round trip \$3.40. First-class coaches and every comfort guaranteed.

and liver tonic. Gentle, reliable, sure.
